SENOUSSI FREE ZONE CO. CATALOG

senoussifreezone.com

Welcome to Our Catalog

About Us

Senoussi Free Zone Co. Since 1938, we've been a reputable leader in **industrial safety and PPE solutions** all across Egypt, collaborating with various types of industries. We provide world-class personal protective equipment (PPE), like workwear, gloves, safety footwear, helmets, fall protection, and even respirators. Besides PPE, we stock lots of other stuff to keep your workplace safe. This includes things like gas detectors, products to help you clean up spills, and and diverse safety equipment. We're here to support your business so it can run safely and smoothly. At Senoussi, **protection isn't just something we sell, it's really about our promise to everyone involved:** our people, how well things work, and making sure everything is super safe.

Our Key Partners

Ansell

Chemical Protective Suit AlphaTec® 1800 Comfort Model 195

The AlphaTec™ 1800 Comfort Model 195 is designed for workers in warm environments who need a perfect balance between **protection and comfort.**

It provides reliable defense against **low-hazard liquid sprays and fine particulates**, while remaining **lightweight, breathable, and anti-static**, making it ideal for long working hours and active environments.

Industries Served

- Chemical
- Automotive
- Life Sciences
- Metal Fabrication
- Food Processing

- **Microporous laminate technology** for Type 5/6 protection
- **Breathable “Comfort” fabric** reduces the risk of heat stress
- **Optimized body fit** for enhanced mobility and safety

- **Anti-static** (tested to EN 1149-5 and AATCC 76)
- **Low linting** to reduce contamination risk in sensitive areas
- **Silicone-free**, suitable for paint and coating applications

- **Elasticated hood, wrists, waist, and ankles** for a secure fit
- **Twoway front zipper** with resealable storm flap

Chemical Resistant Gloves

AlphaTec® Solvex® 37-695

The AlphaTec® Solvex® 37-695 gloves offer **flexible, heavy-duty chemical protection** for a wide range of industrial applications.

Made from durable **nitrile compound (0.425 mm thick)**, these gloves provide **excellent resistance to chemicals, punctures, and abrasion** while maintaining high levels of **comfort and dexterity**.

Designed with **cotton flock lining** to reduce perspiration and **reversed lozenge texture** for superior grip, they ensure safety and confidence in both wet and dry environments.

Industries Served

- Chemical Processing
- Automotive and Aftermarket
- Food Industry
- Metal Fabrication
- Energy and Utilities

- **0.425 mm nitrile compound:** Enhanced strength and chemical resistance
- **Cotton flocked interior:** Absorbs perspiration for long-term comfort

- **Reversed lozenge finish:** Improved grip in wet and dry conditions
- **Flexible design:** Ensures dexterity during precise handling tasks

- **Extended cuff (380 mm length):** Extra forearm protection

Cut Resistant Industrial Gloves

EDGE® 48-706

The **EDGE® 48-706** gloves are a **cost-effective solution** designed for **medium-duty industrial applications** requiring excellent **cut, abrasion, and grip performance**.

Featuring a **seamless HPPE/fiberglass** liner with **foam nitrile palm coating**, they deliver a high level of protection while maintaining **comfort, flexibility, and breathability**.

An ideal alternative to traditional leather or polyurethane gloves, these gloves ensure safety and dexterity in dry or slightly oily environments.

Industries Served

- Automotive
- Construction
- Metal Fabrication
- Machinery & Equipment
- Glass Manufacturing

- **ANSI Cut Level A3 / EN ISO 13997 Cut Level C** protection
- **Foam nitrile palm coating** provides superior **grip and abrasion resistance**

- **13-gauge seamless liner** for enhanced comfort and flexibility
- **Breathable knit design** reduces heat buildup for longer wear

- **Durable construction** for medium to heavy-duty tasks
- **Complies with EN 420 and EN 388 (4X43C)** mechanical hazard standards

Multi-Purpose Industrial Gloves

EDGE® 48-919

The **EDGE® 48-919 gloves** are designed for **light-duty industrial applications** that demand both **oil repellence** and **strong grip**.

Made from a **seamless polyester liner** and **fully dipped in durable NBR (nitrile rubber)**, these gloves provide excellent **abrasion resistance** and **protection from industrial fluids**, ensuring dry, comfortable hands throughout the workday.

The **rough nitrile palm finish** delivers a **secure grip in oily conditions**, making them ideal for assembly and maintenance work involving lubricated or coated parts.

Industries Served

- Automotive
- Construction
- Metal Fabrication
- Machinery & Equipment

- **Full NBR (nitrile) dip coating** provides **resistance to oil and industrial fluids**
- **Double-layer nitrile design** keeps hands dry and comfortable
- **Rough palm texture** ensures a secure grip in oily environments

- **Elastic knit wrist** ensures a snug, secure fit
- **Excellent abrasion resistance** extends glove life

- **Complies with EN 420 (General Requirements) and EN 388 (4121A)** mechanical hazard standards
- **Lightweight polyester liner** enhances comfort and dexterity

Medium-Duty Cut-Resistant Industrial Gloves

EDGE® 48-929

The **EDGE® 48-929** gloves provide **medium-duty protection** with superior **grip, cut resistance, and oil protection**, making them ideal for handling sharp or oily components.

Built with a **fully dipped NBR coating** and a **durable seamless liner**, these gloves offer heightened abrasion resistance and secure handling of small to medium-sized industrial parts coated in oil, lubricants, or contaminants.

Tested under **EN 420** and **EN 388 mechanical hazard standards**, the 48-929 is a **cost-effective, performance-driven solution** for industrial environments that require dependable protection against cuts, oil exposure, and sharp edges. They are also **FDA-approved for food contact**, expanding their versatility.

Industries Served

- Automotive & Aftermarket
- Metal Fabrication
- Machinery & Equipment
- Glass Manufacturing
- Aerospace
- Oil & Gas
- Transportation
- Chemical Processing

- **Fully dipped nitrile coating** for complete oil and fluid resistance
- **Rough palm texture** delivers a **strong, secure grip** in oily and industrial environments

- **EN 388: 4X43C** cut and abrasion protection
- **Elastic knit wrist** ensures comfort and a secure fit

- **Suitable for food handling** (FDA-compliant materials)
- **Durable design** for medium-duty applications involving sharp or rough edges

Cut-Resistant Sleeves

HyFlex® 11-250

The **HyFlex® 11-250** sleeves deliver advanced **arm protection** with superior comfort and sustainability.

Equipped with **INTERCEPT™ Cut Resistance Technology**, these sleeves meet **ANSI/ISEA Cut Level A3** and **EN ISO Cut Level B**, making them ideal for handling sharp, rough, or metal components in industrial environments.

Made with **HPPE yarn**, they offer a **cool, breathable feel**, while the secure **bicep cuff** keeps the sleeve in place during intensive work.

The design is **silicone-free**, preventing contamination when working with metal parts before painting and it features **37% recycled content**, reducing environmental impact.

Fully **FDA food-handling compliant**, Oeko-Tex® certified, and designed for long-term comfort, these sleeves are one of the most versatile arm-protection solutions in the industry.

Industries Served

- Automotive & Aftermarket
- Machinery & Equipment
- Metal Fabrication
- Glass Repair & Manufacturing

- **INTERCEPT™ Cut Resistance Technology**
ANSI/ISEA 105-2024 **Cut Level A3**
EN ISO 13997 **Cut Level B**
- **HPPE seamless knit** for cool, breathable comfort

- **Silicone-free** to prevent contamination on metals before painting
- **Environmentally conscious:** made with **37% recycled content**
- **Oeko-Tex® certified**, free from harmful substances

- **Food handling compliant:**
FDA 21 CFR 177.1520
FDA 21 CFR 177.2600
- Available in **Multiple Widths:** Narrow, Wide, Extra-Wide
- **Over-edge Colors** indicate width: Red / Black / Light Blue

Light-Duty Oil Repellent Multi-Purpose Gloves HyFlex® 11-920

The **HyFlex® 11-920** gloves deliver **advanced oil repellence**, excellent **grip performance**, and long-lasting durability for light-duty industrial tasks.

Designed with **RIPEL™ Liquid Repellence Technology**, they create an impermeable barrier that prevents oils, lubricants, and industrial fluids from contacting the skin.

The gloves also feature **ANSELL GRIP™ Technology** on the palm-dipped nitrile coating, ensuring a **secure grip in oily environments** while maintaining high dexterity.

Their seamless **15-gauge nylon liner** offers exceptional comfort, breathability, and an ergonomic fit for extended wear.

Built with multi-layer nitrile coating, these gloves meet **ANSI Abrasion Level 4** and **EN Abrasion Level 3**, providing dependable wear life and reducing replacement costs.

They are also **machine-launderable**, making them a cost-efficient option for industrial teams.

Industries Served

- Automotive
- Machinery & Equipment
- Metal Fabrication
- Oil & Gas
- Manufacturing & Assembly Lines

- **RIPEL™ Liquid Repellence Technology** prevents oils from reaching the skin
- **ANSELL GRIP™ Technology** ensures outstanding grip on oily or lubricated parts

- **Seamless 15-gauge nylon liner** for high comfort and dexterity
- **Multi-layer nitrile coating** increases glove life
- **Machine washable:** more economical for long-term use

- **Complies with EN 420 & EN 388 (3131A)** mechanical standards
- **Light-duty performance** ideal for precision tasks in oily environments

Light-Duty Multi-Purpose Gloves HyFlex® 48-101

The **HyFlex® 48-101** gloves are engineered for **light-duty applications** requiring excellent **comfort, precision, and abrasion resistance**.

Designed with a thin, flexible polyurethane palm coating and a breathable nylon liner, they offer exceptional **dexterity**, making them ideal for handling small parts, assembly tasks, and general production work.

These gloves provide improved **tactility, durability, and safety**, outperforming many traditional cotton or leather gloves used in similar environments. Perfect for dry or lightly oily conditions, they ensure steady grip performance with minimal hand fatigue.

Industries Served

- Automotive
- Machinery & Equipment
- Manufacturing & Assembly

- **Excellent abrasion resistance** for extended glove life
- **Thin PU coating + 13-gauge nylon liner** for superior dexterity

- **High tactility** for precision tasks and handling small components
- **Lightweight, comfortable design** ideal for long shifts

- **Knitwrist cuff** ensures secure fit and keeps debris out
- **Also available in vend-pack format**
- Complies with **EN 420 & EN 388 (4131A)** mechanical standards

Welding & Thermal Protection Gloves ActivArmr® 43-217

The **ActivArmr® 43-217** gloves are engineered for **heavy-duty thermal and welding applications**, offering exceptional protection against **heat, sparks, flames, and weld spatter**.

Compliant with **EN 12477 Type B**, these gloves provide a rare combination of **thermal resistance and high dexterity**, making them ideal for TIG welding and precision metalworking tasks.

Constructed using **premium full-grain goatskin, welted seams, and para-aramid stitching**, they deliver superior durability, flexibility, and long-lasting performance.

The long **split-cowhide gauntlet cuff** ensures improved wrist and forearm protection during high-risk operations.

Industries Served

- Machinery & Equipment
- Automotive
- Oil & Gas
- Utilities
- Metal Fabrication

- **EN 12477 Type B certified** for welding & thermal protection
- **Premium goatskin leather** for heat resistance and flexibility

- **Three-dimensional thumb design** for exceptional welding precision
- **Wetted seams + para-aramid thread** enhance durability and lifespan

- **Extended split cowhide gauntlet** protects the wrist & forearm
- Ideal for handling **sharp, hot, or rough metal components**
- Suitable for TIG welding, grinding, brazing, metal fabrication & maintenance

ZERO ALL BLACK (S3S | SR | ESD)

The **ZERO ALL BLACK** from TOWORKFOR® is a high-performance **S3S certified safety shoe** engineered for superior **comfort, durability, slip resistance, and electrostatic discharge protection.**

Designed with a **sporty, modern look**, this model delivers premium protection while remaining extremely **lightweight**, making it ideal for long hours of work across multiple industries.

Built with advanced materials such as **premium nubuck microfiber, breathable 3D mesh lining, fiberglass toe cap**, and an **E-TPU cushioning system**, the ZERO ALL BLACK ensures enhanced shock absorption, stability, and all-day comfort.

Its **rubber outsole, anti-slip design**, and **water-resistant upper** make it a reliable choice for demanding environments.

Industries Served

- Logistics & Warehousing
- Manufacturing & Production
- Industrial Services
- Retail & Distribution
- Transportation & Delivery

- **Metal Free** lightweight & airport-friendly
- **S3S Certification** for advanced protection
- **SR Slip Resistance** optimal grip on slippery surfaces
- **ESD Protection** avoids electrostatic discharge
- **E-TPU Cushioning Technology** superior rebound & shock absorption
- **Rubber Outsole Performance** grip, traction & smooth walking
- **Advanced Stabilization Features** enhanced motion control
- **TRI-SYSTEM Water Pumping Outsole** improves traction on wet surfaces
- **Water-resistant, breathable upper**
- **Fiberglass toe cap** (protection up to 200 J)
- **FLOAT ultra-light insole** flexible & sweat-absorbing
- **3D Mesh Lining** breathable, flexible & durable

BEJA (S3 | SRC)

The **TOWORKFOR® BEJA** safety shoes are engineered for **maximum comfort, strength, and protection** in demanding industrial environments.

Built from **water-resistant black aniline leather**, they deliver outstanding **durability, anti-slip performance**, and **shock absorption**, making them ideal for **construction, engineering, and outdoor work**.

These shoes feature the **Carbonlight non-metallic toe cap** ultra-light yet resistant up to **200 joules**, along with the **Q-Flex anti-perforation insole** for superior underfoot protection.

The **Fusion Bicolor PU sole** combines a soft, cushioned midsole with a robust outer layer to ensure excellent grip and comfort during long work hours.

Industries Served

- Logistics & Warehousing
- Manufacturing & Production
- Industrial Services
- Retail & Distribution
- Transportation & Delivery

- **EN ISO 20345:2011 S3 SRC certified**
- **Carbonlight Toe Cap** ultra-light, non-metallic protection (200 J)
- **Water-resistant black aniline leather upper** for superior durability

- **Q-Flex Insole** – non-metallic, anti-perforation & anti-static
- **Fusion Bicolor PU Sole** soft midsole + hard outsole for grip & comfort
- **Toe Reinforcement** for extra protection in high-wear zones

- **Mesh Space 3D Lining** for excellent breathability & moisture control
- **Flat anti-static insole** – removable & easy to clean
- **Excellent slip resistance (SRC)** on both ceramic and steel surfaces
- **Lightweight design (614 g in size 42)**

FAFE (S3 | SRC)

The **TOWORKFOR® FAFE** safety shoes are designed for workers who need **durability, stability, and superior protection** in demanding outdoor and industrial environments.

Built using **water-resistant suede leather**, these shoes offer a strong balance of **comfort, breathability, and robust resistance** against abrasion, fluids, and impact hazards.

Equipped with the **Carbonlight non-metallic toe cap** (200 J resistance) and the **Q-Flex anti-perforation insole**, the FAFE ensures complete underfoot and toe protection without adding unnecessary weight.

The **Fusion Bicolor PU outsole** provides soft cushioning plus a hard-grip outer layer, ideal for long workdays on rough or slippery surfaces.

Industries Served

- Construction
- Engineering
- Utilities
- Manufacturing
- Industrial Services

- **S3 SRC Certified** for high-performance protection
- **Carbonlight Toe Cap (200 J)** ultra-light, non-metallic safety
- **Water-resistant suede upper** durable & breathable

- **Q-Flex Anti-Perforation Insole** non-metallic, anti-static, flexible
- **Fusion Bicolor PU Sole** dual-density comfort + strong grip
- **Flat Anti-Static Insock** soft, supportive & removable

- **Mesh Space 3D Lining** breathable and moisture-controlling
- **Toe Reinforcement** added protection in high-wear zones
- **Excellent slip resistance (SRC):**
Ceramic + detergent
Steel + glycerine

GEAR (S3 | SRC)

The **TOWORKFOR® GEAR** safety shoes are engineered for **extreme durability, high grip, and superior outdoor performance**, making them ideal for the toughest environments such as construction sites, engineering operations, and oil platforms. Built from **Brown Crazy Horse leather**, these shoes provide excellent **water resistance, breathability, and flexibility**, paired with the industry-leading **Michelin North nitrile rubber outsole**, designed for full control, exceptional traction, and outstanding performance in wet, oily, icy, and rugged outdoor conditions. Featuring the ultra-light **Carbonlight toe cap**, the **Q-Flex anti-perforation insole**, and **heat-resistant outsole (up to 300°C)**, the GEAR shoe delivers maximum protection while maintaining comfort and stability.

Industries Served

- Construction
- Engineering
- Oil & Gas
- Mechanical & Maintenance
- Utilities & Outdoor Industrial Work

- **S3 SRC Certified** advanced protection for severe work conditions
- **Carbonlight Toe Cap** (Non-metallic, 200 J impact protection)
- **Q-Flex Anti-Perforation Insole** flexible, anti-static & metal-free
- **Brown Crazy Horse Leather Upper** durable, breathable & water resistant

- **Michelin North Nitrile Rubber Outsole with:**
 - Pumping channels** for water evacuation
 - Anti-slip tread** for slippery surfaces
 - Spikes & biting edges** for snow & ice
 - Self-cleaning tread design**

- **Heat-Resistant Sole** up to 300°C
- **100% Non-metallic Construction**
- **BIORELAX Antibacterial Insock**, odour reduction + full recovery

HALF PIPE (S3 | SRC | ESD)

The **TOWORKFOR® HALF PIPE** safety shoes are designed for **indoor, warehouse, and administrative work environments** where comfort, flexibility, and reliable foot protection are essential.

Built with a **suede upper, rubber basket outsole**, and **steel toe cap**, they provide excellent **water resistance, breathability, anti-slip capability**, and **ESD electrostatic discharge protection**.

Engineered with a lightweight athletic style, the HALF PIPE delivers enhanced comfort thanks to its **Comfort Insock**, flexible outsole design, and innovative 3D **Mesh lining** that ensures optimal airflow and odor control.

Industries Served

- Warehousing & Logistics
- Administrative & Facility Operations
- Manufacturing
- Light Industry
- Distribution & Retail

S3 Certified Protection

- Water-resistant suede upper (WRU)
- Energy absorption heel (E)
- Antistatic properties (A)
- Fuel/oil-resistant outsole (FO)
- Penetration-resistant midsole (P)

- **Steel Toe Cap:** impact protection up to 200 J
- **Q-Flex Insole:** anti-perforation, non-metallic, anti-static
- **ESD Protection** (EN 61340-5-1): prevents electrostatic buildup
- **3D Mesh Lining:** breathable & odor-resistant
- **Grip System zones** on heel & toe for increased durability and stability

- **Basket Rubber Outsole with:**
High flexibility
Strong grip & traction
Enhanced elasticity & cushioning
- **Comfort Insock:** lightweight, soft, removable & anti-static
- **Suitable for long indoor shifts & standing-intensive work**

HIKER BROWN (S3 | SRC | WR)

The **TOWORKFOR® HIKER BROWN** safety shoes are built for **heavy-duty outdoor, construction, and engineering work**, delivering premium **waterproofing, durability, slip resistance**, and impact protection.

Made from **long-lasting brown nubuck leather** and equipped with a **Hydratec waterproof membrane**, these shoes ensure the feet stay warm, dry, and comfortable even in harsh outdoor environments.

The **Carbonlight non-metallic toe cap**, **Q-Flex anti-perforation insole**, and **Fusion Bicolor PU outsole** combine to offer top-level protection without compromising mobility.

Designed for extreme stability, the HIKER BROWN features **Rub X Pro heel support, toe reinforcement**, and 3D mesh lining for optimal breathability and comfort.

Industries Served

- Construction
- Engineering
- Utilities
- Industrial Services
- Oil & Gas

- **S3 Certified** full protective features for tough environments
- **WR Waterproof Resistance**
Hydratec membrane keeps feet dry
- **SRC Slip-Resistance** safe traction on wet, ceramic, or steel surfaces
- **HRO Heat-Resistant Outsole**
contact heat protection up to 300°C

- **Q-Flex Anti-Perforation Insole**
flexible, non-metallic & anti-static
- **Brown Nubuck Leather Upper**
durable, flexible, breathable
- **Fusion Bicolor PU Sole** dual-density grip + soft cushioning
- **Rub X Pro Heel Support**
enhanced balance and stability
- **Carbonlight Toe Cap (200 J)**
non-metallic and ultra-light

- **Toe Reinforcement** extra durability in high-wear areas
- **Comfort Insock** soft, anti-static & fully removable
- **100% Non-Metallic Construction** (Except steel-free toe cap room)
- **Breathable 3D Mesh Lining**
odor-resistant & moisture controlling

WARMUP YELLOW (S3 | SRC | ESD)

The **TOWORKFOR® WARMUP YELLOW** safety shoes combine a **sporty design** with high-performance protection, making them ideal for **indoor workplaces, logistics, retail, warehousing, and general administrative environments**.

Made with **abrasion-resistant microsuede**, a **Triple Speed EVA & Rubber outsole**, and equipped with **aluminium toe protection**, this model delivers exceptional **comfort, lightweight movement, and electrostatic discharge (ESD) safety**, ensuring full protection in environments where static control is required.

The **Active Foam insock** helps reduce muscle fatigue, while the **Float Insole** offers unmatched lightness and flexibility, perfect for long working hours, walking-intensive roles, and high-mobility tasks.

Industries Served

- Warehousing & Logistics
- Retail & Distribution
- Light Manufacturing
- Facility Management
- Office & Administrative Work

- **S3 Certified** full protective features for light-to-medium indoor industrial environments
- **SRC Slip-Resistance** strong traction on ceramic & steel surfaces
- **ESD Protection** (EN 61340-5-1) prevents electrostatic buildup
- **Aluminium Toe Cap (200 J)** lightweight impact resistance

- **Microsuede Upper Material** soft, anti-stain & extremely abrasion-resistant
- **Triple Speed EVA & Rubber Outsole** flexible, light, anti-slip, and self-cleaning
- **Active Foam Insock** reduces fatigue & heel pressure
- **Float Insole (Non-metallic)** extra light, flexible & sweat-absorbent

- **Top Grip & Traction Control Reinforcements** enhanced stability & grip
- **X-Stabilizer Heel Support** improved balance & ankle stability
- **Water Absorption-Resistant Materials** suitable for colder, wetter indoor conditions

WATT (SB | P | SRC | FO | E | WR | WRU | EH 18,000V)

The **TOWORKFOR® WATT** safety shoes are engineered for **electrical professionals** who require maximum protection in environments with **high-voltage hazards**.

Built with **Nubuck leather**, a **Sympatex waterproof membrane**, and a **special insulating nitrile rubber outsole**, the WATT model ensures advanced **electrical hazard protection up to 18,000V**, making it one of the most robust and specialized safety shoes in its class.

The **Carbonlight composite toe cap**, **Q-Flex anti-perforation cork insole**, and **insulating PU insock** provide a fully **metal-free**, flexible, and comfortable wearing experience, ideal for workers exposed to electrical installations, power distribution systems, and environments where electrostatic discharge or shock hazards are present.

Industries Served

- Electrical Utilities
- Railway & Infrastructure
- Power Distribution & Transmission
- Maintenance & Engineering
- Industrial Facilities

- **Electrical Hazard (EH) Protection**
Tested to withstand 18,000V at 60Hz for one minute (ASTM F2413-18)
- **SB Basic Safety Certification** + full protective add-ons:
 - P** – Anti-perforation midsole
 - SRC** – Anti-slip on ceramic & steel
 - FO** – Fuel oil resistant outsole
 - E** – Heel energy absorption
 - WR** – Full water resistance
 - WRU** – Water-resistant upper
 - HRO** – Heat-resistant outsole (up to 300°C)
- **Nubuck Leather Upper** soft, breathable, durable
- **Sympatex Waterproof Membrane** absorbs vapor & expels moisture
- **Carbonlight Composite Toe Cap (200 J)** ultra-light & metal-free
- **Q-Flex Cork Insole** anti-perforation & anti-static
- **Insulating PU Insock** designed specifically for electrical work
- **Fusion Sole System** PU midsole + insulating nitrile rubber outsole
- **Toe Reinforcement** extra durability in high-wear zones
- **Metal-Free Construction** reduces conductivity risks
- **Excellent grip** on oily, wet, or industrial surfaces

LE MANS (S3L | SR | HRO | CI | FO) Advantage 6C89.22

The **TOWORKFOR® LE MANS** safety shoe is engineered for professionals working in **construction, engineering, and outdoor industrial environments.**

Combining advanced protection with all-day comfort, this footwear features a **non-metallic ultra-light CarbonLight toe cap,**

high-grip nitrile rubber outsole, and breathable premium leather upper, delivering safety, durability, and performance in demanding conditions.

Industries Served

- Construction & Engineering
- Industrial Manufacturing
- Oil & Gas & Utilities
- Logistics & Warehousing
- Outdoor & Heavy-Duty Operations

- **CarbonLight Toe Cap** Ultra-light, non-metallic protection resistant up to 200 joules
- **Q-Flex Anti-Perforation Insole** Non-metallic, anti-static protection against sole penetration

- **S3L Certified Protection** Closed heel, energy absorption, antistatic, water-resistant upper, and penetration-resistant sole
- **Heat Resistant Outsole (HRO)** Nitrile rubber outsole resistant to contact heat up to 300°C
- **Slip Resistance (SR)** Excellent grip on ceramic and steel surfaces

- **Fuel & Oil Resistant (FO)** Designed for industrial and mechanical environments
- **Cold Insulation (CI)** Protection against low-temperature working conditions

PORTWEST®
PEAK PROTECTION

FR21 – Bizflame Work Lightweight FR Coverall

The **Portwest FR21** is an advanced **super lightweight flame-resistant and anti-static coverall**, engineered specifically for **hot climates and offshore environments**.

Constructed using the innovative **Bizflame™ Plus 210g fabric**, this coverall offers multi-standard protection against radiant, convective, and contact heat, while maintaining exceptional breathability and comfort.

Made from **99% cotton** blended with **1% carbon fibre**, the FR21 delivers excellent tear strength, durability, and inherent anti-static properties. Ideal for oil & gas, petrochemical, fabrication, and high-risk industrial settings. Despite its lightweight build, the FR21 offers **full protective performance**, a **brass zipper**, 10 functional pockets, knee pad compatibility, and a comfortable action-back design for unrestricted movement.

Industries Served

- Oil & Gas
- Petrochemical
- Power & Utilities
- Welding & Fabrication
- Offshore Engineering

- **Ultra-lightweight 210g flame-resistant fabric**
- **Bizflame™ Plus:** 99% cotton + 1% carbon fibre for anti-static protection
- **EN ISO 11612 (A1+A2, B1, C1, E2, F1)** – protection from radiant, convective & contact heat
- **EN ISO 11611 Class 1 (A1+A2)** – welding and allied processes
- **EN 1149-5** – anti-static protection

- **ASTM F1959/F1959M-12 (ATPV 9.1 cal/cm²)** – arc flash protection

- Lightweight & breathable for **extreme heat conditions**

- **10 pockets** for maximum storage

Rule pocket

Sleeve pocket

Two back pockets

Two-tier knee pad pockets

- **Action back** design for mobility & comfort

- **Hook-and-loop cuffs** for secure wrist fit
- **Durable brass zip** for long-lasting performance
- Available in sizes **XS to 5XL**
- Ideal for offshore, petrochemical, and hot-climate work

Araflame Work Lightweight FR Coverall Portwest AF73 (Multi-Norm | Inherent FR | 150g)

The **Portwest AF73 Araflame Work Lightweight FR Coverall** is engineered for professionals working in the most hazardous environments.

Made from **Araflame™ Work**, a premium inherent flame-resistant fabric blend (93% Meta-Aramid, 5% Para-Aramid, 2% Carbon Fibre), this coverall offers superior thermal protection while remaining **exceptionally lightweight at just 150g**.

Designed for industries such as **oil & gas, petrochemical, utilities, and maintenance**, the AF73 provides excellent comfort, breathability, and durability.

Triple-stitched seams, secure pockets, and an ergonomic fit make it ideal for long shifts in demanding conditions.

Industries Served

- Oil & Gas
- Petrochemical & Refining
- Energy & Utilities
- Manufacturing & Heavy Industry
- Maintenance & Field Operations

- **Inherent flame resistance**, protection will not diminish with washing
- **Ultra-lightweight 150g fabric** for all-day comfort
- **Outstanding tear & tensile strength**
- **Protection from radiant, convective & contact heat**
- **Electric arc protection** (ELIM 3.8 cal/cm² • ATPV 4.5 cal/cm²)

- **Triple-stitched seams**, built for durability
- **Two-way brass front zip** for easy access
- **8 functional pockets** for essential storage
- **Two back patch pockets**
- **Hook and loop adjustable cuffs**

- **Flame-resistant industrial wash tape**
- **Radio loops** for communication equipment
- **Ergonomic fit** for unrestricted movement
- **Breathable, soft-touch fabric**

Iona Cotton Coverall – Portwest C814 (100% Cotton | Lightweight | Reflective Visibility)

The **Portwest C814 Iona Cotton Coverall** provides a practical, lightweight, and comfortable solution for daily industrial wear.

Made from **100% Kingsmill Cotton (190g)**, it delivers excellent breathability, moisture absorption, and softness, keeping the wearer cool and comfortable throughout long shifts. Reflective tape on shoulders, arms, and legs enhances visibility, improving safety in low-light conditions.

Designed for durability, everyday use, and full mobility, the C814 includes an action back, a concealed zipper, multiple secure pockets, and UPF 40+ protection.

Industries Served

- Manufacturing
- Warehousing
- Automotive
- Maintenance & Repairs
- Facilities & Operations

- **100% Cotton Kingsmill Fabric (190g)**, breathable, soft, durable
- **Reflective tape** for enhanced visibility and workplace safety
- **Moisture-wicking fabric** keeps the body cool and dry
- **Action back** for full range of motion

- **Lightweight design** suitable for warm environments
- **Concealed two-way zip** for security and quick access
- **8 functional pockets**, including:
phone pocket
zipped pockets

- **UPF 40+ fabric** blocks 98% of UV rays
- Designed for comfort, practicality, and everyday wear
- Tested to withstand industrial work conditions

Bizflame Work FR Coverall Portwest FR50 (Multi-Norm | 350g | Anti-Static | Welding Class 2)

The **Portwest FR50 Bizflame Work** Coverall is engineered to meet the **rigorous demands of offshore, oil & gas, petrochemical, and heavy-industry environments.**

Made from the advanced Bizflame™ Work fabric (**99% cotton, 1% carbon fibre, 350g**), it provides **multi-standard flame-resistant, anti-static, and welding protection** while maintaining comfort and durability.

High-visibility reflective tape is double stitched for maximum visibility in low-light environments. The garment also includes **triple-stitched seams**, multiple secure pockets, a concealed 2-way brass zip, and ergonomic features designed for mobility and long-term wear.

This is one of Portwest's most trusted FR coveralls globally, known for strength, protection, and multi-hazard compliance.

Industries Served

- Oil & Gas
- Petrochemical
- Energy & Utilities
- Mining & Heavy Industry
- Fabrication & Welding
- Construction & Maintenance

- **Multi-norm flame-resistant protection**
- **Inherent anti-static properties**
- **Protection against radiant, convective & contact heat**
- **Class 2 welding protection (EN ISO 11611)**
- **Arc flash protection** (ELIM 8.6 cal/cm² • ATPV 9.8 cal/cm²)

- **Electric arc APC 1 classification**
- **Triple-stitched seams** for superior durability
- **High-visibility reflective tape**, double-stitched
- **Concealed 2-way front brass zip**
- **Concealed zip chest pocket**
- **Action back** for improved freedom of movement

- **Hook & loop adjustable cuffs**
- **Rule pocket & two back patch pockets**
- **10 total pockets** for maximum storage
- **UPF 40+**, blocks 98% of UV rays
- **Available up to 6XL**
- **Ideal for demanding industrial environments**

Hi-Vis Band and Brace Vest C470 (Class 2 | Lightweight | Rail-Compliant)

The **Portwest C470** is one of the most widely used high-visibility vests in the industry, featuring the classic **band-and-brace reflective tape configuration** for maximum visibility.

Constructed from **100% polyester warp-knit fabric (124g)**, it is lightweight, durable, and comfortable, ideal for daily use in a wide range of environments. Certified for high-visibility performance, the C470 meets **EN ISO 20471 Class 2, ANSI/ISEA 107**, and (in Orange) **RIS 3279 TOM** railway standards.

Easy to wear with a **hook-and-loop front closure**, it is designed with a generous fit, ensuring comfort for all body types and layering needs.

Available in multiple compliant colors and sizes up to **7XL**.

Industries Served

- Transport & Logistics
- Rail & Road Safety
- Construction & Industrial Work
- Public Works & Municipal Services
- Warehousing & Operations

- **EN ISO 20471 Class 2** high-visibility protection
- **ANSI/ISEA 107 Type R & Type P Class 2**
- **RIS 3279-TOM** certified (Orange only)
- **AS 4602.1:2024 Class D/N & AS/NZS 1906.4** compliant
- **Lightweight, breathable 124g polyester warp knit**

- **Classic band & brace reflective tape** for maximum visibility
- **Hook-and-loop closure** for quick and easy access
- **Generous fit** for comfort and layering

- **CE certified & UKCA marked**
- **Certified after 50 washes**, ensuring long-term durability
- **Available up to size 7XL**
- Ideal for general industrial, traffic, public works, and logistics applications

Warsaw Hi-Vis Contrast Executive Vest C476 (Class 1 | Multi-Pocket | Two-Tone)

The **Portwest C476 Warsaw Hi-Vis Contrast Executive Vest** delivers high visibility, functional storage, and stylish two-tone contrast panels designed to keep workers seen and organized in busy environments. Made from durable **100% polyester warp-knit fabric (124g)**, this executive vest includes multiple functional pockets, dual-orientation ID holders, radio loop, D-ring attachment, and front zip fastening.

The contrasting bottom panels also help **protect against dirt**, making it ideal for environments where appearance and visibility matter.

Industries Served

- Transport & Logistics
- Construction
- Warehousing
- Facilities & Operations
- Public Works

- **EN ISO 20471 Class 1** certified
- **ANSI/ISEA 107 Type O Class 1** compliant
- **Two-tone contrast panels** reduce visible dirt
- **Dual ID holder** (portrait + landscape display)

- **7 functional pockets**, including:
Chest pockets
Two lower patch pockets
Side pockets
- **Radio loop** for quick attachment of communication equipment

- **D-ring** for keys or ID badges
- **Front zip opening** for easy on/off
- **Reflective tape** ensures visibility in low-light conditions
- Durable and lightweight polyester construction

Berlin Hi-Vis Executive Vest S476 (Class 2 | Multi-Pocket | Executive Design)

The **Portwest S476 Berlin Hi-Vis Executive Vest** is designed to combine the lightweight comfort of a waistcoat with the practical functionality of a multi-pocket work vest.

Perfect for warm conditions or indoor environments where a hi-vis jacket is too heavy, the S476 includes **multiple storage pockets**, a **dual-orientation ID holder**, **radio loop**, and **reflective tape** for increased visibility.

Made from **durable 100% polyester warp-knit fabric (124g)**, this executive vest provides excellent breathability, comfort, and visibility. It is compliant with **EN ISO 20471 Class 2** and **ANSI/ISEA Type R Class 2**, ensuring maximum compliance in high-risk work zones.

The Orange variant is also fully certified to **RIS 3279 TOM** for railway applications.

Industries Served

- Construction & Infrastructure
- Transport & Logistics
- Public Works & Municipal Services
- Railway & Traffic Management
- Warehousing & Industrial Operations

- **EN ISO 20471 Class 2** certified
- **ANSI/ISEA 107 Type R Class 2** compliant
- **RIS 3279 TOM** (Orange only)
- **Lightweight, breathable polyester fabric**
- **Dual-orientation ID holder** (portrait & landscape)

- **7 practical pockets**, including:
 - Chest pockets
 - Two lower patch pockets
 - Two side pockets
 - Phone + pen holder section

- **Reflective tape** for enhanced visibility
- **Front zip closure** for easy access
- **Radio loop** for communication equipment
- **D-ring** for keys or ID badges
- Perfect for warm climates or indoor high-visibility work settings

PW3 Hi-Vis Winter Jacket T400 (Thermal | Waterproof | EN ISO 20471 Class 3)

The **Portwest T400 PW3 Hi-Vis Winter Jacket** combines premium protection, modern styling, and exceptional warmth, making it one of the most advanced high-visibility winter jackets in the market.

Constructed from **durable 300D Oxford polyester** with a **stain-resistant PU coating**, this jacket is designed to withstand harsh weather, tough industrial environments, and long working hours.

A key feature is the **Insulatex heat-reflective lining panel**, which reflects body heat back to the wearer, ensuring maximum warmth and comfort in cold conditions, even down to **-40°C (EN 342 certified)**.

With multiple secure pockets, waterproofing, triple standards compliance, and a modern athletic fit, the T400 is ideal for professionals who need high performance in demanding environments.

Industries Served

- Construction
- Transport & Logistics
- Rail & Road Safety
- Utilities & Energy
- Public Works
- Warehousing & Cold Environments

- **EN 343 Class 3:1 X**, Waterproof protection (15,000 mm)
- **EN 342 cold protection**, Certified down to **-40°C**
- **EN ISO 20471**, High-visibility Class 3 (S and above), Class 2 (XS)
- **RIS 3279 TOM**, Rail industry certification (Orange Only)
- **ANSI/ISEA 107 Type R & P Class 3**

- **Insulatex heat-reflective lining** for superior warmth
- **High-performance waterproof fabric**, PFAS-free Texpel™ Splash Eco finish
- **Durable 300D Oxford polyester**, stain-resistant, double PU coating
- **Zippered chest pocket + 2 zippered side pockets** for secure storage
- **Curved back hem** for added coverage

- **Quick-dry knitted inner cuffs** for comfort and wind protection
- **Hook and loop adjustable cuffs**
- **Easy-grip zip pullers** even with gloves
- **Twin-stitched seams** for long-lasting durability
- **Ergonomic, modern fit with corporate styling**

Classic Rain Coat S438 (Waterproof | EN 343 | All-Weather Protection)

The **Portwest S438 Classic Rain Coat** delivers reliable **waterproof protection** and long-length coverage for workers operating in wet, rainy, or unpredictable weather conditions.

Constructed from **190T polyester with a durable PVC coating (210g)**, it provides exceptional resistance to wind and rain while remaining lightweight and comfortable for all-day wear.

Its smarter design includes a **packaway hood, vented back yoke, inner elasticated cuffs**, and **taped seams** for complete waterproof performance.

Ideal for industrial use, outdoor tasks, and general all-weather protection, this coat offers excellent value, durability, and comfort.

Industries Served

- Construction
- Utilities & Facilities
- Transport & Logistics
- Public Works
- Maintenance & Janitorial

- **EN 343 Class 3:1 X** waterproof protection (WP 5,000 mm)
- **Longer-length coat** for extra coverage
- **Lightweight waterproof fabric** with PVC coating
- **Taped seams** prevent water penetration

- **Packaway hood** with eyelets for ventilation
- **Vented back yoke** and underarm eyelets for breathability
- **Inner elasticated cuffs** to keep out wind & rain
- **Front zip opening** for quick and easy access

- **Generous fit** for comfort and layering
- **40+ UPF rated** fabric, blocks 98% of UV rays
- **REACH compliant PVC coating**
- **2 front pockets** for secure storage

Leather Welding Apron – SW10 (Class 2 Welding Protection)

The **Portwest SW10 Leather Welding Apron** is a premium, heavy-duty protective garment designed for professional welders working in intense, high-risk environments.

Made from **split cowhide leather (1.3 mm thickness)** and stitched with **para-aramid thread**, this apron offers exceptional resistance to sparks, molten metal splatter, heat, and abrasion.

Its ergonomic design includes **adjustable straps**, a **quick-release buckle**, and a secure **chest pocket**, ensuring both comfort and functionality during demanding welding tasks.

This apron is built to last and provides **EN ISO 11611 Class 2 (A1)** protection, ideal for high-intensity welding operations.

Industries Served

- Welding & Fabrication
- Automotive & Mechanical Workshops
- Construction & Steelwork
- Oil & Gas
- Heavy Manufacturing

- **Premium split cowhide leather** (1.3 mm thickness) for superior durability
- **Para-aramid stitching** for enhanced heat and flame resistance
- **EN ISO 11611 Class 2 (A1)** welding protection (highest class)

- **Adjustable straps** for a secure, custom fit
- **Quick-release buckle** for easy on/off
- **Chest pocket with hook-and-loop closure** for tools & essentials

- **Designed for tough industrial environments**
- **CE Certified & UKCA Marked**

FFP2 Valved Respirator P201 (Cup Style | CE & UKCA Certified)

The Portwest P201 is a high-performance FFP2 valved respirator designed to protect workers against fine toxic dust, fumes, and water-based mists.

This cup-style mask provides a filtration efficiency of $\geq 94\%$, suitable for environments with airborne contaminants up to $10\times$ the WEL/TLV.

The P201 includes all the core capabilities of the P200 model, with the added benefit of a high-efficiency exhalation valve to reduce heat build-up, ideal for use in hot and humid conditions.

Its adjustable nose bar, soft EVA foam padding, and ultrasonic welded straps ensure an ergonomic and secure fit during extended wear.

Industries Served

- Manufacturing & Engineering
- Construction
- Metal Fabrication
- Maintenance & Workshops
- Warehousing & Industrial Services
- Carpentry & Finishing

- **FFP2 certified** – protects against solid & liquid particles of average toxicity
- **High-performance exhalation valve** reduces heat & improves comfort
- **≥94% filtration efficiency**

- **Comfortable cup-style respirator**
- **Adjustable nose bar** – reduces fogging on glasses & improves fit
- **EVA foam nose bridge padding** for enhanced comfort

- **Ultrasonic welded straps** for reliability and secure fit
- **CE & UKCA Certified | CE-CAT III**
- **Retail box packaging** (ideal for organized PPE storage)

FFP3 Fold-Flat Valved Respirator P351 (Dolomite Tested | CE & UKCA)

The **Portwest P351** is a premium **FFP3 fold-flat respirator** engineered for environments with **highly toxic dusts, oil/water-based mists, and hazardous airborne contaminants.**

With **99% filtration efficiency**, this mask provides the highest level of disposable respiratory protection available under EN 149.

This upgraded P351 model features the **Dolomite (D) optional clogging test**, which ensures:

- Easier breathing
- Longer-lasting filtration performance
- Higher comfort in dusty environments

Its **vertical flat-fold design, individual polybag packaging, and high-performance exhalation valve** make it ideal for both industrial use and vending machine distribution.

Industries Served

- Manufacturing & Heavy Industry
- Construction & Demolition
- Woodworking & Joinery
- Metal Fabrication
- Chemical Processing
- Maintenance & Industrial Services

- **FFP3 (NR D) certified** highest filtration class ($\geq 99\%$)
- **Dolomite clogging test (D)** enhanced breathability over long use sessions
- **High-performance exhalation valve** reduces heat build-up in hot & humid conditions

- **Vertical flat-fold design** compact, hygienic, easy to store
- **Individually wrapped** for hygiene & vending machine compatibility
- **Adjustable nose bar** improves seal & reduces glasses fogging

- **Foam nose bridge padding** for comfort during long shifts
- **Ultrasonic welded straps** strong, secure fit
- **Retail box packaging**
- **CE Certified & UKCA Marked**

Composite Leather Rigger Boot FC16 (S3S || FO | SR | 100% Metal Free)

The **Portwest FC16 Composite Rigger Boot** is a high-performance, 100% non-metallic safety boot designed for tough industrial conditions.

Made with a **premium buffalo grain oil leather upper** and a **dual-density PU/Rubber outsole**, it delivers exceptional durability, grip, and heat resistance up to **300°C**.

The composite toecap and anti-penetration midsole offer full S3S protection without the weight of steel, making this rigger boot **lighter, safer, and ideal for warm climates**.

Part of the **Compositelite Grip** collection, it provides enhanced slip resistance, fuel/oil resistance, and all-day comfort for demanding environments.

Industries Served

- Construction & Infrastructure
- Energy, Gas & Petrochemical
- Manufacturing & Industrial Services
- Mining & Quarrying
- Logistics & Warehousing

- **100% metal-free construction**
- **S3S rated safety boot** (highest standard for rugged industrial use)
- **Composite toecap**, lightweight, non-metallic impact protection
- **Anti-penetration composite midsole**
- **Premium buffalo grain oil leather upper**

- **Dual-density PU/Rubber outsole**, strong, durable, high-grip
- **300°C heat-resistant outsole (HRO)**
- **Fuel & oil resistant outsole (FO)**
- **Slip-resistant outsole (SR)**
- **Unlined for increased breathability in warm climates**

- **Energy absorbing seat region** for added comfort
- **Anti-static (A)**
- **CE certified**
- Ideal for **heavy-duty industrial, construction, and outdoor work**

AirTech Bump Cap – Mid Peak PS59 (EN 812 | Ventilated | Adjustable)

The **Portwest PS59 AirTech Bump Cap** is a modern, ventilated, and lightweight head protection solution designed for environments where **minor bumps, scrapes, and head contact hazards** may occur, without the need for a full safety helmet.

Featuring a **mid-length 5 cm peak**, this bump cap is suitable for both indoor and outdoor applications. Its highly ventilated construction, combining **side mesh panels** with **large inner shell openings**, ensures superior airflow and long-wear comfort.

A modern textile design with reflective piping increases visibility, while the ABS inner shell and EVA padding deliver effective low-impact shock absorption.

Industries Served

- Manufacturing
- Automotive & Workshops
- Warehousing & Distribution
- Maintenance & Facilities
- Transport & Logistics
- Food Processing (non-impact environments)

- **Mid peak (5 cm)** ideal for general indoor & outdoor use
- **Hi-visibility colour options** enhance daytime visibility
- **Advanced ventilation system**
Side cooling mesh fabric
Wide openings in the ABS inner shell

- **Inner ABS shell + EVA padding** for impact absorption
- **Reflective piping** improves low-light visibility
- **Adjustable buckle strap** for secure and comfortable fit

- **Lightweight & breathable** suitable for extended wear
- **Supplied in a retail display bag**
- **CE certified to EN 812**

AirTech Bump Cap – Micro Peak PS69 (EN 812 | Ventilated | Adjustable)

The **Portwest PS69 AirTech Bump Cap** features a modern, textile-based design combined with a highly ventilated ABS protective shell.

Designed for environments where **head bumps, scrapes, and low-impact hazards** are a risk but where full hard hats are not required.

Two ventilation systems (side mesh + shell vents) deliver maximum airflow, making this one of the most breathable bump caps in its class.

A micro peak (2.5 cm) ensures compatibility in **confined spaces or indoor settings**, improving upward visibility.

Reflective piping enhances worker visibility in low-light environments, and a buckle-adjustment system ensures a secure, customized fit.

Industries Served

- Manufacturing
- Warehousing & Distribution
- Facility Management
- Automotive Service
- Logistics & Transport
- Light Industrial Work

- **Micro peak (2.5 cm)** ideal for indoor tasks & tight spaces
- **Highly ventilated** design
Mesh textile panels
Vent slots in inner ABS shell

- **ABS internal shell + EVA cushioning** for shock absorption
- **Modern aesthetic with reflective piping**
- **Adjustable buckle strap** for personalized fit

- **Lightweight & breathable** for long-wear comfort
- **CE certified | EN 812 compliant**
- Supplied in **a retail-friendly bag**

Portwest PW59 – Classic Bump Cap (EN 812 | Long Peak 7 cm | Ventilated | Adjustable)

The **Portwest PW59 Bump Cap** combines a **classic baseball-cap look** with certified low-impact protection, making it suitable for workplaces where there is a risk of **minor bumps, scrapes, and head contact hazards**.

Featuring **ventilation ports** for increased airflow and a **long 7 cm peak** for enhanced eye and sun protection, the PW59 delivers comfort, durability, and practicality. The internal **ABS shell** with **high-density EVA padding** ensures effective shock absorption, while the **hook-and-loop** adjustable strap provides a secure fit.

An excellent choice for warehouses, logistics, maintenance teams, and low-risk industrial environments.

Industries Served

- Warehousing & Distribution
- Manufacturing
- Automotive & Workshops
- Maintenance & Facilities
- Transport & Logistics
- Retail Back-of-House
- Light Industrial Work

- **Long 7 cm peak** improved eye shading & additional frontal protection
- **Ventilation ports** increase breathability during long shifts
- **High-density EVA** provides durable comfort and impact cushioning

- **Inner ABS protective shell** with soft padding for shock absorption
- **Classic baseball-cap aesthetic** with metallic ring holes
- **Hook & loop adjustable strap** for a secure, tailored fit
- **Padded headband** for enhanced comfort

- **Retail-ready packaging**
- **CE certified**
- **UKCA marked**
- Now available in **new colours**

Maintenance Spill Kit SM33

120 Litre Maintenance Kit

The **SM33 kit** is an economical, all-in-one spill response solution designed for industrial environments. Housed in a durable yellow, two-wheeled polyethylene bin, it allows quick mobility to the point of a spill.

The grey absorbent maintenance pads are engineered with coverstocks that remain intact even when saturated, making them ideal for oil-based and water-based industrial liquids.

Features

- 60 x Pads
- 2 x Cushions
- 6 x Socks
- 4 x Blue Disposal Bags
- 4 x Bag Ties
- 1 x Instruction and Contents Sheet
- 1 x 2 Wheeled Industrial Bin

Industries Served

- Manufacturing
- Automotive & Aftermarket
- Metals & Fabrication
- Logistics & Warehousing
- Petrochemical & Maintenance Facilities

Standards

- BS 7959-1
- BS 7959-3

Portwest SM63 – 120 Litre Oil-Only Spill Kit

The **Portwest SM63 – 120L Oil-Only Spill Kit** is engineered for fast, effective response to **oil-based spills**, including lubricants, fuels, diesel, solvents, hydraulic oil, and vegetable oils.

Designed using **hydrophobic technology**, all absorbents **repel water and float even when fully saturated**, making this kit ideal for marine, offshore, industrial, and outdoor environments.

Features

- 60 x Pads
- 2 x Cushions
- 6 x Socks
- 4 x Blue Disposal Bags
- 4 x Bag Ties
- 1 x Instruction and Contents Sheet
- 1 x 2 Wheeled Industrial Bin

Industries Served

- Oil & Gas
- Petrochemical Plants
- Marine & Offshore
- Manufacturing Lines
- Workshops
- Ports & Harbors
- Transport & Logistics
- Industrial Maintenance Teams

Standards

- BS 7959-1 – Absorbency tests
- BS 7959-2 – Slip resistance
- BS 7959-3 – Oil-only absorbents

Portwest SM91 – 50 Litre Chemical Spill Kit

The **Portwest SM91 – 50L Chemical Spill Kit** provides rapid, reliable containment of **hazardous chemical spills**, including acids, alkalis, corrosives, solvents, and unknown liquids.

Engineered using **reinforced chemical-resistant absorbents**, this kit is suitable for both **indoor and outdoor** environments. The bright **yellow colour coding** ensures quick identification during emergencies.

Features

- 30 x Pads
- 1 x Cushion
- 2 x Socks
- 1 x Blue Disposal Bag
- 1 x Bag Tie
- 1 x Instruction and Contents Sheet
- 1 x Clear Clip Handled Bag

Industries Served

- Chemical Plants
- Laboratories
- Warehouses
- Manufacturing Lines
- Research Facilities
- Transport & Logistics
- Industrial Chemical Storage
- Emergency Response Teams

Standards

- BS 7959-1 – Absorbency testing
- BS 7959-3 – Chemical absorbents

IronCLAD
KONG® ORIGINAL

KONG® DECK CREW KDC5

Engineered for extreme environments, the KONG® Deck Crew glove is built for **maximum abrasion resistance, enhanced cut protection, and full-impact coverage**. Featuring a **4-layer palm, exclusive CT5™ cut-resistant material**, and **complete back-of-hand protection**, this glove is purpose-built for Oil & Gas operations, rigging work, mining, demolition, and heavy construction. Treated with **DuPont™ Teflon®** for oil and water resistance, it remains durable and protective even in the harshest conditions.

Available Sizes

S • M • L • XL • XXL • XXXL

Industries Served

- Rigging
- Oil & Gas Drilling, Extraction & Refining
- Fracking
- Tool Pushing
- Mining
- Heavy Construction
- Demolition

Standards

- EN 388:2016 – 4X44EP
- EN 388:2003 – Level 5
- ANSI/ISEA Cut Level A4
- Category II

- **4-layer palm design** for extreme abrasion resistance
- **Exclusive CT5™ Cut-Resistant Material** (EN388 Level E / ANSI A4)

KONG® Patented Impact Protection:

- Metacarpal protection – 80% impact absorption
- Knuckle protection – 90% impact absorption
- Finger protection – 76.4% impact absorption (including sidewall & fingertips)

- **DuPont™ Teflon® treated shell oil & water-resistant**
- **High-contrast design** for enhanced visibility
- **Complete back-of-hand protection tailored** for Oil & Gas industry hazards
- **Reinforced durability** for high-abuse environments

KONG® 360 A5 Cut & Abrasion Resistant Gloves – KKCA5

The **KONG 360 A5** gloves are high-performance work gloves engineered for **cut resistance, abrasion durability, and all-around protection**. They're ideal for demanding tasks that require strong mechanical hazard resistance such as metal handling, sheet metal work, heavy fabrication, waste handling, glass handling, and general industrial use. Built with a **durable coated palm**, reinforced fingertips, and a flexible yet robust shell, these gloves deliver **excellent grip, dexterity, and resistance to wear**, while also providing **ANSI A4 / EN 388 (4X44F) cut protection** and strong abrasion resistance, great for heavy-duty industrial environments.

Available Sizes

S • M • L • XL • XXL • XXXL

Industries Served

- Oil & Gas Drilling, Extraction, & Refining
- Fracking
- Tool Pushing
- Mining
- Demolition
- Heavy Construction
- Rigging

Standards

- ANSI Cut Level A4 – Heavy-duty cut resistance
- EN 388 4X44F – Mechanical hazard protection
- Category II PPE

- **High cut resistance** (ANSI A4 / EN 388 4X44F) protects against sharp objects and metal edges
- **Abrasion-resistant palm coating** for long wear when handling rough or abrasive materials

- **Reinforced fingertips & palm** for durability and extended lifespan
- **Good dexterity & grip** for precise handling of tools and components

- **Comfortable fit & flexible shell** allowing extended wear without fatigue
- Suitable for heavy fabrication, metalwork, glass handling, waste processing, and general industrial tasks

KONG® Original – Heavy Duty Work Gloves – SDX2

The **KONG Original** glove is a robust, heavy-duty work glove designed for industrial tasks that demand durability, abrasion resistance, and reliable hand protection. Built to withstand rough conditions, this glove is ideal for general industrial use, metal fabrication, construction, rigging, and other heavy-duty applications.

With a rugged outer shell, reinforced palms and fingers, and tough grip surfaces, the KONG Original offers dependable protection and long service life under harsh working conditions.

Available Sizes

S • M • L • XL • XXL • XXXL

Industries Served

- Metal fabrication & handling
- Construction & rigging
- Industrial maintenance & repair
- Warehouse operations
- Heavy materials handling
- Automotive workshops

Standards

- Certified under EN 388 for mechanical hazard protection (abrasion, tear, cut, puncture)
- Category II PPE suitable for industrial use

- **Heavy-duty construction** for high-abuse industrial environments
- **Reinforced palms & fingers** for extended wear and durability

- **Strong grip surface** for secure handling of tools, metals, and rough materials
- **Good abrasion resistance** ideal for metal fabrication and construction tasks

- **Comfortable fit & flexible design** for prolonged use
- Suitable for rigging, construction, metalworking, warehouses, and heavy manual labor

IRONCLAD – Vibration & Impact Work Gloves (Model WWI2)

The WWI2 gloves are purpose-built to protect workers from **vibration, impact, and mechanical hazards** commonly encountered in heavy-duty industrial tasks.

With an engineered shell that absorbs and disperses force, reinforced palm and finger areas, and robust impact zones, WWI2 offers high durability and protection for demanding tasks involving tools, machinery, and heavy equipment.

Available Sizes

XS • S • M • L • XL • XXL • XXXL

Industries Served

- Heavy machine operation
- Metal fabrication & welding
- Construction & building works
- Rigging & maintenance
- Demolition & scrap handling
- Automotive repair & assembly
- Any environment with impact or vibration hazards

Standards

- Meets relevant mechanical safety standards for impact & vibration-resistant gloves (as per manufacturer specification)
- Category II PPE for general industrial risks

- **Impact protection** reinforced back-of-hand and finger guards to protect against blows and crushing hazards
- **Vibration dampening design** for comfort when using power tools or vibrating equipment

- **Durable palm coating** for abrasion resistance and long-term durability
- **Good grip and dexterity** for handling tools and materials safely

- **Heavy-duty construction** suited for industrial, construction, automotive, and rigging work
- **Extended wear comfort** built for long shifts in tough conditions

Retractable Blocks with Galvanized Steel Wire Rope 10 Meter with Steel Snap Hook – PCGS10

The **KARAM PCGS10 Retractable Block** is a high-quality, sturdy fall protection accessory designed for controlled movement, safe access, and retrieval tasks in industrial environments.

Equipped with a **10 m galvanized steel wire rope**, robust housing, and a secure steel snap hook, this device is ideal for work at height, material handling, rescue operations, confined access, and controlled descent applications.

Highly durable and engineered for rigorous industrial use, the PCGS10 enhances both **operational safety and efficiency** when used as part of a comprehensive personal fall arrest system or rigging setup.

6 - 10 - 15 - 20 - 30 M

Industries Served

- Construction & Infrastructure
- Oil & Gas Platforms
- Utilities & Telecom Towers
- Industrial Maintenance
- Rescue & Emergency Teams
- Rope Access Professionals

- **Galvanised steel wire rope** excellent strength and corrosion resistance
- **Steel snap hook** for secure connection to harness or load

- **Robust retractable block housing** for durability in industrial conditions
- **Designed for** fall protection & controlled access
- **Ideal for** rescue, inspection, maintenance, construction, and rigging

- **Enhances safety** when used with full body harness systems
- **Suitable for** both personnel and tool/part lowering

Retrieval Retractable Block – PCGS25R 25 m Galvanized Steel Rope Steel Snap Hook

The **KARAM PCGS30R Retrieval Retractable Block** is a heavy-duty safety accessory engineered for reliable fall protection, controlled descent/ascent, rescue operations, and access positioning tasks at height.

It features a **25 m galvanized steel wire rope** and a durable **steel snap hook**, providing extended reach, excellent strength, and dependable performance in demanding industrial settings.

Designed for rope access, confined space entry/exit, rigging, inspection, maintenance, and rescue work, this block ensures safe and efficient movement when used as part of a complete fall arrest or positioning system.

Industries Served

- Construction & Infrastructure
- Oil & Gas / Offshore Platforms
- Utilities & Telecom Towers
- Industrial Maintenance & Inspection
- Rescue & Emergency Response Teams
- Rope Access Professionals

- 25 m galvanized steel wire rope strong, corrosion-resistant, and reliable
- Steel snap hook with secure locking mechanism

- Durable retractable block housing built for industrial use
- Designed for fall protection, retrieval, and controlled access
- Suitable for personnel and tool material lowering

- Complements full body harness systems and rescue kits
- Easy deployment and controlled rope movement

Retrieval Retractable Block – PCGS30R 30 m Galvanized Steel Rope Steel Snap Hook

The **KARAM PCGS30R Retrieval Retractable Block** is a heavy-duty safety accessory engineered for reliable fall protection, controlled descent/ascent, rescue operations, and access positioning tasks at height.

It features a **30 m galvanized steel wire rope** and a durable **steel snap hook**, providing extended reach, excellent strength, and dependable performance in demanding industrial settings.

Designed for rope access, confined space entry/exit, rigging, inspection, maintenance, and rescue work, this block ensures safe and efficient movement when used as part of a complete fall arrest or positioning system.

Industries Served

- Construction & Infrastructure
- Oil & Gas / Offshore Platforms
- Utilities & Telecom Towers
- Industrial Maintenance & Inspection
- Rescue & Emergency Response Teams
- Rope Access Professionals

- 30 m galvanized steel wire rope strong, corrosion-resistant, and reliable
- Steel snap hook with secure locking mechanism

- Durable retractable block housing built for industrial use
- Designed for fall protection, retrieval, and controlled access
- Suitable for personnel and tool material lowering

- Complements full body harness systems and rescue kits
- Easy deployment and controlled rope movement

Micron Block with 2 m Aluminium Cable – MIC02

The **KARAM MIC02 Micron Block** is a **compact, lightweight fall protection accessory** designed for use in work-at-height systems, vertical access tasks, and rescue operations.

Featuring a **2 m aluminium swivel wire rope and a quarter-turn locking bulb-type hook**, the Micron Block combines smooth retraction, controlled movement, and secure attachment.

The integrated **fall indicator** visually alerts users to any load event, enhancing safety and inspection efficiency. This product is ideal for technicians, rope access professionals, maintenance teams, and confined space entry support.

Industries Served

- Construction & Infrastructure
- Utilities & Telecom
- Oil & Gas / Offshore
- Maintenance & Inspection Services
- Rope Access & Rescue Teams

- **2 m aluminium swivel cable** lightweight, corrosion resistant, smooth action
- **Quarter-turn locking bulb-type hook** secure connection with ease of use

- **Integrated fall indicator** visual alert of load impact or deployment
- **Compact & portable design** for versatile applications
- **Designed for fall arrest, rescue, and access positioning applications**

- **Ideal as part of a fall protection system** with a harness & anchor
- **Durable construction for extended service life**

PN21 Full Body Safety Harness (3 Adjustable Points – 1 Attachment Point)

The **KARAM PN21 Safety Harness** is a reliable full-body harness designed for **fall arrest and work-at-height applications** across a variety of industries.

With three adjustment points, it provides a secure and personalized fit, while a **single attachment point** offers dependable anchorage for lanyards, lifelines, or fall arrest devices.

Perfect for maintenance, construction, tower work, utilities, and industrial access, the PN21 delivers comfort, safety, and easy adjustments for all body sizes.

Industries Served

- Construction
- Utilities & Telecom
- Industrial Maintenance
- Oil & Gas Platforms
- Manufacturing Services
- Rope Access & Rescue Teams

- **3 Adjustment Points** shoulder and leg adjustments for a snug, comfortable fit
- **Single Attachment Point** strong D-ring for fall arrest connections

- **Full-Body Design** distributes fall forces evenly across the body
- **Quick-Release Buckles** for ease of donning and doffing
- **Durable Webbing & Stitching** for high load support

- **High-Visibility Labeling** for inspection tracking
- **Lightweight & Comfortable** for extended wear

KARAM PN56 – Tower & Rescue Safety Harness

The **KARAM PN56 Tower & Rescue Harness** is a high-performance full-body safety harness engineered for **tower climbing, rescue operations, and advanced fall protection applications.**

Featuring **2 adjustable points** for leg and shoulder fit, and four strategically located attachment points, the PN56 offers **flexible positioning, secure fall arrest anchorage,** and enhanced support during complex access and rescue operations.

Designed to exceed industry expectations for comfort, adjustability, and safety performance, this harness is ideal for professionals working on towers, wind turbines, telecom structures, elevated platforms, and confined access zones.

Industries Served

- Telecommunications
- Energy & Wind Turbine Maintenance
- Utilities & Power Lines
- Oil & Gas Platforms
- Construction & Structural Maintenance
- Rescue & Emergency Services
- Industrial Rope Access Teams

4 Attachment Points:

- D-Ring at back (fall arrest)
- Front chest D-Ring (work positioning)
- Left and right side D-Rings (work positioning / restraint)

2 Adjustment Points: Leg and shoulder adjustment for personalized fit

- **Comfort Padding** reduces fatigue during long work shifts
- **Durable High-Strength Webbing & Alloy Hardware** superior load support
- **Quick-Release Buckles** for easy donning and doffing

- **Fall Indicator** visual sign of impact event
- **High-Visibility Labels** for inspection traceability
- Compatible with **lanyards, lifelines, and SRLs for fall arrest, positioning, and rescue systems**

Full Body Safety Harness PN10S +361

The **KARAM PN10SP-361 Safety Harness** is a premium full-body fall-arrest harness designed for demanding work-at-height and fall-protection applications. Equipped with **dual attachment points** and **scaffold hooks**, this harness allows simultaneous protection on multiple anchor points during climbing, transition, and horizontal movement on structures.

Built for durability, comfort, and safety, it is ideal for **construction, scaffolding, tower work, industrial maintenance, and utilities**. The harness distributes fall forces evenly across the body, allows secure connection of personal protective equipment, and delivers confidence when working at height.

Industries Served

- Construction & Civil Works
- Industrial Maintenance
- Oil & Gas / Offshore
- Telecommunications & Utilities
- Manufacturing Services
- Rescue & Rope Access Operations

- **Double lanyard system** with two scaffold-type hooks
- **Full-body harness design** for optimal fall distribution
- **Back D-Ring** for primary fall arrest anchorage

- **Dual side D-rings** for work positioning/restraint
- **Adjustable shoulder & leg straps** for a snug, ergonomic fit
- **Sturdy webbing & high-strength stitching** for long-term reliability

- **Integrated padding** for comfort during extended wear
- **Quick-release buckles** for easy donning and doffing
- **Standard industrial load capacities**

Full Body Safety Harness PN 21(WB) + PN 361

The **KARAM PN-21WBPN-361 Safety Harness** is a rugged, professional-grade full body fall-protection system specially designed for **construction, scaffolding, industrial maintenance, and tower work**. Featuring a dual lanyard configuration with steel scaffold hooks, this harness allows secure anchoring at multiple points while enabling controlled movement along structural elements.

Designed for comfort, adjustability, and safety, the PN-21WBPN-361 supports long-duration wear with **reinforced webbing, durable hardware, and ergonomic padding**, ensuring reliability in demanding work-at-height environments.

Industries Served

- Construction & Civil Works
- Industrial Maintenance
- Utilities & Telecom
- Oil & Gas Platforms
- Rope Access & Rescue Teams
- Heavy Engineering & Fabrication

- **Dual safety lanyards** allows continuous fall protection during transitions
- **Steel scaffold hooks** secure connections to anchor points during scaffolding & structural work
- **Full body harness design** distributes fall forces evenly across shoulders, legs & pelvis

- **Multiple attachment points**
 1. **Back D-Ring** for primary fall arrest
 2. **Side positioning D-Rings** for work positioning/restraint
- **Adjustable shoulder & leg straps** for a personalized fit
- **Industrial-grade webbing & stitching** for maximum durability

- **Ergonomic padding** for comfort during extended use
- **Quick-release buckles** for easy donning & doffing
- **Ideal** for use with SRLs, lifelines, and fall arrest systems

Full Body Safety Harness PN24

The **KARAM PN-24 Safety Harness** is a full-body fall arrest harness designed for **work at height and personal fall protection** across industrial, construction, and maintenance environments.

Manufactured with durable webbing, secure attachment points, and ergonomic fit adjustments, the PN-24 offers dependable safety and comfort for professionals working on elevated structures or in fall-risk situations.

This harness is suitable for use with lanyards, lifelines, retractable fall arrest devices (SRLs), and positioning systems, making it a versatile choice for a wide range of height-safety applications.

Industries Served

- Construction & Civil Works
- Industrial Maintenance & Repair
- Telecommunications & Towers
- Oil & Gas Platforms
- Utilities & Power Infrastructure
- Rope Access Services & Rescue Teams

- **Full-body harness design** distributes forces evenly during a fall
- **Back attachment point** secure connection for fall arrest devices
- **Adjustable leg and shoulder straps** for personalized fit

- **Side D-rings (where applicable)** for work positioning/restraint
- **Industrial-grade polyester webbing** for durability
- **Quick-release buckles** for fast, secure donning and doffing

- **Comfort padding** for extended wear
- **High-visibility labeling** for inspection tracking
- **Lightweight yet robust construction**

Magna 2 Premium Range Full Body Safety Harness

The **KARAM MAGNA2** harness is a **premium professional full-body safety harness** engineered for work-at-height applications where comfort, adjustability, and reliable fall protection are essential.

Equipped with **multiple attachment points** and ergonomic adjustments, the MAGNA2 provides high safety performance for fall arrest, work positioning, and restraint applications. Durable construction, quality hardware, and ergonomic design make it ideal for **construction, industrial maintenance, utility work, rope access, and rescue tasks.**

Industries Served

- Construction & Industrial Work
- Utilities & Telecom Infrastructure
- Oil & Gas Platforms
- Industrial Maintenance Services
- Rope Access & Rescue Teams

- **Premium full-body design** for advanced fall protection
- **Multiple attachment points** for versatile anchorage (fall arrest & positioning)
- **Ergonomic padding** on shoulders, back & legs for extended comfort

- **Quick-adjust buckles** for secure fit and easy donning/doffing
- **High-strength polyester webbing & rugged alloy hardware**
- **High-visibility labels** for easy inspection and certification tracking

- **Compatible with compatible SRLs, lanyards, lifelines, and connectors**
- **Designed for** demanding height safety environments

Magna 3 Premium Range Full Body Safety Harness

The **KARAM MAGNA3** is a **premium full body safety harness** designed for professionals working at height across construction, industrial, telecom, utilities, and rescue applications.

Built with high-strength materials, ergonomic padding, and advanced attachment options, this harness combines **comfort, safety, and versatility** for demanding work-at-height environments.

Featuring multiple anchor points, quick-adjust buckles, and superior load distribution, the MAGNA3 harness supports safer positioning, fall arrest, and work-retention applications when used with complementary fall protection systems.

Industries Served

- Construction & Civil Engineering
- Industrial Maintenance
- Utilities & Energy
- Telecommunications
- Oil & Gas Platforms
- Rope Access & Rescue Teams

- **Premium full-body design** for superior fall arrest performance
- **Multiple attachment points** for fall arrest, positioning, and restraint
- **Ergonomic shoulder, back & leg padding** for extended wear comfort

- **Quick-adjust buckles** for secure and easy fit
- **Heavy-duty high-strength webbing & hardware** for durability
- **High-visibility label patches** for easy inspection & compliance

- **Compatible with SRLs, lanyards, lifelines, and accessory connectors**
- **Ideal for** elevated work platforms, tower access, rescue work, and structural climbing

KARAM PN 20 (RG) Vest Safety Harness

The **KARAM PN 20 (RG) Vest Harness** is a **full-body fall arrest harness integrated into a high-visibility vest**, designed for professionals who require **comfort, convenience, and safety during extended work at height**.

Its ergonomic vest construction allows easy wearing while distributing load evenly across the body. The harness includes **multiple attachment points, adjustable straps**, and storage features, making it ideal for construction, industrial maintenance, utilities, and tower work.

Industries Served

- Construction & Engineering
- Industrial Maintenance
- Utilities & Energy
- Telecommunications
- Oil & Gas
- Infrastructure Projects

- **Integrated vest-style full body harness** for improved comfort and usability
- **Fluorescent light green vest** for high visibility in industrial environments
- **Dorsal D-Ring** for primary fall arrest attachment

- **Two front textile loops** for fall arrest connection
- **Adjustable chest, shoulder, and thigh straps** for secure fit
- **Sit strap** for enhanced comfort during extended suspension

- **Inside pocket** to store leg straps when not in use
- **Velcro-secured D-Ring window** to prevent slipping into vest
- **Durable double zip system** for easy wearing and removal

SHELBLAST PN542 Industrial Safety Helmet

The **SHELBLAST PN 542 Safety Helmet** is a high-performance industrial helmet designed to deliver **maximum head protection, superior shock absorption, and all-day comfort** in demanding work environments.

Equipped with a **unique 8-point attachment cradle**, reinforced shell design, and advanced rain-management system, the PN 542 ensures effective protection against falling objects, impact forces, and electrical hazards. The helmet is suitable for use across **construction, utilities, industrial maintenance, oil & gas, and electrical applications**.

Industries Served

- Construction & civil engineering
- Electrical & utility work
- Industrial maintenance
- Oil & gas operations
- Infrastructure & plant safety
- Manufacturing facilities

- **Advanced shock absorption system** with 8-point attachment cradle
- **Ratchet-type size adjustment** for secure fit and enhanced comfort
- **Ventilated shell with shutters** to prevent rainwater seepage

- **Protective peak design** for improved impact resistance
- **Integrated rain management system** to reduce water flow toward the neck
- **Side accessory slots** for face shields & hearing protection

- **Extra-thick shell walls** for improved impact durability
- **Replaceable chin strap options** for extended product life

KARAM RFH02 – FFP2S Disposable Face Respirator

The **KARAM RFH02 FFP2S Disposable Face Respirator** is a high-performance respiratory protection solution designed to safeguard users against **airborne particles, dust, bacteria, and viruses** in high-exposure environments.

Manufactured with a **multi-layer electrostatically charged filtration system**, this respirator delivers **excellent particulate filtering efficiency while maintaining low breathing resistance**, ensuring comfort during extended use. The ergonomic headband design provides a secure, universal fit suitable for industrial, healthcare, and professional applications.

Industries Served

- Construction & Industrial Sites
- Oil & Gas / Petrochemical
- Mining & Heavy Industry
- Manufacturing & Processing
- Healthcare & Laboratories

- **FFP2S level protection** with advanced multi-layer filtration
- **Electrostatically charged filter media** for enhanced capture of fine particles
- **High filtration efficiency (>97%)**, exceeding standard requirements

- **Soft, hypoallergenic fabric** minimizes skin irritation
- **Water-repellent outer layer** with sweat-absorbent inner layer
- **Secure headband design** for stable, all-day wear

- **Breathable polypropylene construction** for user comfort
- **Universal size** suitable for most users
- Designed for **up to 12 hours of continuous use**

KARAM RFH02+ FFP2S Disposable Respirator with Valve

The **KARAM RFH02+ FFP2S Disposable Face Respirator** is an upgraded version of the standard FFP2S mask, featuring a **high-efficiency exhalation valve** for improved comfort and reduced heat buildup during extended use.

With multi-layer electrostatically charged filter media and a headband configuration, this respirator delivers **excellent protection against fine dust, pollutants, aerosols, and biological particulates**, ideal for industrial, construction, and frontline safety applications.

Its ergonomic design, secure headbands, and integrated valve make it suitable for long shifts while maintaining a **tight and comfortable seal**.

Industries Served

- Construction & Civil Works
- Industrial Manufacturing
- Metal Fabrication
- Wood & Furniture Production
- Mining & Heavy Industry
- Maintenance & Facilities

- **FFP2S protection level** ($\geq$ 94% filtration efficiency)
- **High-performance exhalation valve** for reduced heat and moisture buildup
- **Multi-layer electrostatically charged filter media**

- **Secure headband fit** with comfortable elasticity
- **Lightweight and breathable** construction
- **Ergonomic nose bridge** for improved seal and reduced fogging

- **CE & UKCA certified** for industrial PPE use
- Ideal for **extended wear** in multi-shift environments

KARAM RFH 03+ FFP3 Disposable Respirator

The **KARAM RFH-03 FFP3 Disposable Respirator** delivers **premium respiratory protection** against fine particulates, hazardous dusts, aerosols, and airborne contaminants. Designed for industrial and occupational environments where **maximum respiratory filtration efficiency** is required, the RFH-03 provides superior protection while maintaining comfort and breathability during extended use.

Built with a multi-layer filter media and ergonomic headband design, this mask offers **excellent sealing comfort**, low breathing resistance, and reliable protection for professionals across demanding applications.

Industries Served

- Construction & Civil Works
- Mining & Heavy Industry
- Manufacturing & Fabrication
- Chemical & Processing Plants
- Pharmaceutical & Controlled Environments
- Maintenance & Workshop Operations

- **FFP3 protection class**, highest classification for disposable respirators ($\geq 99\%$ filtration)
- **Multi-layer filter media** for superior particle capture
- **Headband style** for secure and stable fit

- **Adjustable nose bridge** to enhance seal & minimize leakage
- **Low breathing resistance** for comfortable longer wear
- **Lightweight, breathable design**

- **Soft inner lining** for skin comfort
- **CE certified & UKCA marked** for PPE compliance

KARAM TL01 – Elasticated Tools Lanyard

The **KARAM TL01** Elasticated Tools Lanyard is designed to prevent **drop hazards** by securing tools while working at height, on scaffolding, towers, platforms, or elevated structures.

Elasticated for flexibility and movement, this lanyard helps reduce the risk of accidents caused by falling tools, protecting personnel and equipment below.

Constructed with durable materials and a secure attachment system, the TL01 ensures that essential tools remain reliably connected to the user without interfering with workflow.

Industries Served

- Construction & Infrastructure
- Industrial Maintenance
- Utilities & Telecom
- Oil & Gas & Petrochemical
- Mining & Heavy Industry
- Rope Access & Wind Energy

- **Elasticated design**, expands and contracts for movement freedom
- **Tool retention solution** reduces dropped tool hazards
- **Heavy-duty components** for rugged industrial use

- **Secure attachment ends** for tools and anchor points
- **Compatible with belts, harnesses, and tool belts**

- **Lightweight and flexible** doesn't restrict movement
- **Enhances safety** in elevated work environments

KARAM TL02N – Elasticated Tools Lanyard (No Snap Hook)

The **KARAM TL02N Elasticated Tools Lanyard** is designed to prevent **tool drop hazards** when working at height, on scaffolds, towers, elevated platforms, or access structures.

Unlike some lanyards with fixed hardware, the **TL02N is supplied without a snap hook**, providing flexibility to attach to a worker's belt, harness, or tool system using custom connectors or loops.

The elastically designed allows **smooth extension and contraction**, reducing resistance and minimizing interference with user movement while securely retaining tools.

Industries Served

- Construction & Infrastructure
- Utilities & Telecom
- Industrial Maintenance & Repair
- Oil & Gas / Offshore
- Mining & Heavy Industry
- Rope Access Professionals

- **Elasticated cord design**
extends and retracts with movement
- **Tool retention solution**
prevents dropped tools and parts

- **No snap hook** ideal for custom end fittings or tie-on tool systems
- **Lightweight & flexible**
comfortable for all-day use

- **Heavy-duty components** for rugged workplace environments
- **Ideal for** installation, maintenance, and elevated work

KARAM Suspension Intolerance Strap STS01(N)

The **KARAM Suspension Intolerance Strap** is a safety accessory designed to reduce discomfort and potential suspension trauma for a worker following a fall and arrest.

Used in conjunction with a full-body harness and fall arrest system, this strap provides **support under the thighs**, helping to redistribute weight and maintain blood flow during suspension, which enhances safety and comfort while awaiting rescue or descent.

Industries Served

- Construction & Infrastructure
- Utilities & Telecom
- Industrial Maintenance & Repair
- Oil & Gas / Offshore
- Mining & Heavy Industry
- Rope Access Professionals

- **Suspension relief support** improves circulation and reduces pressure during suspension
- **Universal compatibility** with full-body harnesses

- **Durable webbing and hardware**, long-lasting performance
- **Easy to attach** to harness leg and waist attachment points
- Helps mitigate **suspension intolerance symptoms** following fall arrest

- **Lightweight and portable**, ideal for safety kits and rescue tools
- **Simple design** with secure adjustment

TRIPOD WITH DOUBLE PULLEY HEAD PN 800(DP)(7ft)

The **PN 800 (DP)** Confined Space Entry Tripod is designed to provide reliable anchorage and safe access during confined space operations. Manufactured from **high-strength** materials, it offers **excellent stability and durability**, making it ideal for **rescue, retrieval, and access applications** in industrial environments.

This tripod is compatible **with winches and self-retracting lifelines**, making it an essential solution for vertical entry and rescue operations where safety is critical.

Industries Served

- Oil & Gas
- Utilities & Water Treatment
- Power & Energy
- Construction & Infrastructure
- Industrial Maintenance
- Mining

- **Heavy-duty confined** space entry and rescue tripod
- **Adjustable telescopic legs** for quick setup

- **High load-bearing** anchorage point
- **Corrosion-resistant construction** for long service life
- **Easy to** transport and deploy on site

- **TESTED AS PER**
EN 795:2012 TYPE B &
AS/NZS 5532:2013

WINCH WITH UNIVERSAL BRACKET PN 801(DP)

The **KARAM PN 801DP Confined Space Entry Winch** is a **reliable manual retrieval and rescue winch** designed for safe entry and exit in confined spaces such as pits, tanks, sewers, manholes, and silos.

Paired with the PN-800 Tripod, this winch provides controlled ascent and descent of personnel or loads, supporting efficient rescue, positioning, and confined space operations.

Built for durability and ease of use, the PN-801DP is a critical tool for safety teams, maintenance crews, and industrial service providers who require dependable rescue equipment in potential fall or entrapment scenarios.

Industries Served

- Utilities & Municipal Services
- Oil & Gas Platforms
- Construction & Civil Works
- Industrial Maintenance
- Manufacturing & Processing
- Rescue & Safety Services

- **Manual hand-crank winch** for controlled ascent and descent
- **Smooth mechanical operation**, minimizes jerk and load swing

- Designed for **use with confined space entry tripod systems** (e.g., PN-800)
- **Heavy-duty construction** for reliable industrial performance
- **Compact, portable, and easy** to set up in confined access points

- **Suitable for** personnel rescue and material positioning
- **Enhances safety** during maintenance, inspection, and confined space entry

UNIVERSAL MOUNTING BRACKET FOR RETRIEVAL BLOCK TO BE MOUNTED ON TRIPOD PN 800(45)

The **KARAM PN 800(45) Retrieval Bracket** is a robust accessory designed to be used with the **KARAM Tripod PN 800** family, providing a secure mounting point for **retrieval blocks**, winches, and fall arrest devices. This bracket enhances the flexibility of the tripod system by enabling reliable installation of retrieval devices such as the **PCGS-series retractable fall arrest blocks** and other rescue accessories, making it ideal for **confined space entry, rescue, and controlled access** applications.

Industries Served

- Oil & Gas Platforms
- Municipal & Utilities
- Industrial Plant Maintenance
- Construction & Infrastructure
- Confined Space Safety Operations

- **Tripod accessory bracket** mounts on PN 800 and PN 800(DP) tripods
- Designed to accept **retrieval fall arrest blocks** (e.g., PCGS 20R, PCGS 30R)
- Provides a **secure and stable anchorage point** for raising and lowering users or tools

- **Precision-engineered interface** for safe, compatible connection to fall protection devices
- Enhances the functionality of the tripod system for **confined space and rescue operations**

- **Durable construction** for heavy industrial environments
- **Works with** a variety of KARAM retrieval and winch components

Disposable Earplugs – 1988TDNN

The **Marca TDNN Disposable Earplugs** deliver reliable **hearing protection** in noisy industrial and workplace environments. Designed for comfort and ease of use, these single-use earplugs are ideal for workers exposed to high noise levels during manufacturing, construction, maintenance, and heavy equipment operations.

Made from soft, expandable foam, the TDNN earplugs offer **excellent noise attenuation**, effortless insertion, and a comfortable fit for prolonged use. Their disposable design ensures hygiene and convenience, ideal for both short-term tasks and ongoing daily protection.

EN 352-2
SNR=38 dB
H=37 M=36 L=32

Industries Served

- Construction & Infrastructure
- Manufacturing & Fabrication
- Oil & Gas & Petrochemical
- Industrial Maintenance
- Utilities & Power Generation
- Transportation & Heavy Equipment

Reusable earplug with cord – 1988TRCENY

The **Marca TRCENY Reusable Earplugs** are designed for comfortable, long-lasting **hearing protection** in environments where workers are exposed to elevated noise levels. Unlike disposable earplugs, these reusable plugs are made from premium materials that provide a secure, ergonomic fit and can be cleaned and used repeatedly. Their durable construction makes them ideal for daily use in industrial, construction, and maintenance settings.

Engineered for durability and wearer comfort, the TRCENY earplugs reduce harmful noise exposure while maintaining ease of insertion and removal, a smart choice for safety programs that prefer **sustainable, reusable PPE**.

EN 352-2
SNR=31 dB
H=32 M=28 L=26

Industries Served

- Construction & Civil Works
- Manufacturing & Assembly
- Oil & Gas & Petrochemical
- Industrial Maintenance
- Utilities & Energy
- Transportation & Heavy Equipment

Panoramic eyepiece glasses with length adjustable temples – 2188GNASIN

The **MARCA GNASIN Universal Frame Safety Glasses** combine comfort, protection, and visibility for a wide range of industrial and occupational environments. Designed with a **universal fit**, these safety glasses are ideal for workers who require reliable protection from flying particles, debris, and light impact hazards while maintaining comfort and clear vision throughout the day.

Durably constructed with a lightweight frame and impact-resistant lenses, the GNASIN glasses are ideal for workshops, construction sites, manufacturing floors, and laboratory environments.

EN 166
EN 170
2C-1.2

Industries Served

- Construction & Infrastructure
- Industrial Manufacturing
- Automotive & Mechanical Workshops
- Utilities & Maintenance Services
- Oil & Gas & Petrochemical
- Warehouse & Logistics

Wraparound unilent eyepiece glasses "SPY" 2188GSGSIN

The **Universal Frame Safety Glasses** provide reliable eye protection with a wrap-around design and polycarbonate lenses. Lightweight and comfortable, these glasses offer full coverage against mechanical hazards like flying debris, dust, and particles, while also protecting eyes from solar radiation. Their anti-scratch, durable lenses and ergonomic universal frame make them suitable for extended wear in demanding environments.

EN 166

EN 172

5-3.1

Industries Served

- Construction
- Manufacturing & Assembly
- Oil & Gas
- Petrochemical
- Welding & Metalworking
- Electrical & Mechanical Engineering
- Laboratory & Research Facilities
- Outdoor Work / Solar Exposure

Glasses with clear eyepieces, with flexible temples "SPY PRO" – 2188GSPGSIN

The **Universal Frame Safety Glasses** feature a modern wrap-around design with **gray polycarbonate lenses** treated for **anti-scratch and anti-fog** performance, providing reliable protection against mechanical risks like flying projections and solar radiation. Built with **flexible hypoallergenic silicone temples** for superior comfort and prolonged use, these glasses combine ergonomic fit with side protection coverage and a universal frame design for all-day wear. They are certified to **EN166 F** (impact protection) and **EN1725-3.1** (sunlight protection) standards, suitable for both indoor and outdoor industrial environments where eye safety is critical.

Industries Served

- Construction
- Manufacturing & Assembly
- Oil & Gas
- Petrochemical
- Welding & Metalworking
- Electrical & Mechanical Engineering
- Laboratory & Research Facilities
- Outdoor Work / Solar Exposure

Glasses with clear eyepieces, with flexible temples "SPY PRO" – 2188GSPESIN

The **Universal Frame Safety Glasses** offer enhanced eye protection with a wrap-around design and flexible hypoallergenic silicone temples for superior comfort and prolonged use. These glasses feature **clear mirror polycarbonate lenses** with **anti-scratch and anti-fog** treatments, delivering protection against mechanical risks like flying projections and **radiation risks from extreme sunlight or heat sources**. Lightweight and ergonomic, they comply with **EN166 F** (impact protection) and **EN1725-3.1** (solar protection) standards, making them suitable for both indoor and outdoor environments where eye safety, comfort, and durability are essential.

Industries Served

- Construction
- Manufacturing & Assembly
- Oil & Gas
- Petrochemical
- Welding & Metalworking
- Electrical & Mechanical Engineering
- Laboratory & Research Facilities
- Outdoor Work / Solar Exposure

180° panoramic integral goggle, clear anti-fog eyepiece for mechanical risks “X8 PRO” 2188GIX8PSIN

The **“X8 PRO” Full-Frame Protective Glasses** deliver high-performance eye protection with a **180° panoramic integral goggle design**, offering broad visual coverage and excellent comfort. The clear anti-fog and anti-abrasion polycarbonate eyepiece, combined with a reinforced PVC structure, provides dependable protection against **mechanical risks** such as flying projections and **liquid splashes**, as well as **chemical and UV radiation risks**. Designed with indirect ventilation to reduce condensation and an internal reinforcement to prevent liquid entry, these glasses are compatible with most prescription eyewear and offer **Class1 optical quality** for unobstructed vision. Certified to **EN166 (B3 4N)** and **EN170 (2-1.2)** standards, they are suitable for various industrial environments where eye safety is essential.

Industries Served

- Construction
- Manufacturing & Assembly
- Chemical Processing
- Oil & Gas
- Petrochemical
- Mining & Metals
- Laboratory & Research Facilities
- Maintenance & Utilities

180° panoramic integral goggle, clear anti-fog eyepiece for mechanical risks "X9" 2188GIX9SIN

The **"X9" Full-Frame Protective Glasses** feature a **180° panoramic integral goggle design** with a pivoting **anti-abrasion and anti-fog polycarbonate eyepiece**, providing robust protection against mechanical risks including flying projections, liquid splashes, and splashes of molten metals and hot solids. The ergonomic co-injected PVC structure ensures excellent field of vision, comfort, and durability, while **indirect ventilation** helps reduce condensation. These glasses offer Class 1 optical quality and are compatible with most prescription eyewear. Certified to **EN166 (BT39KN)** for medium-energy impact resistance at high speed and extreme temperatures, they are suited for demanding industrial environments.

Industries Served

- Construction
- Manufacturing & Assembly
- Chemical Processing
- Oil & Gas
- Petrochemical
- Foundries & Metalworking
- Mining & Heavy Industry
- Laboratory & Research Facilities

Safety limit for visits coupled to footwear **1688PVNE**

The **1688PVNE Visiting Toe Cap** is a practical safety footwear accessory designed to provide essential **impact protection (200 J)** in areas where protective toe coverage is mandatory, such as **factories, construction sites, and workshops**. Easily attachable to most existing footwear via a secure **elastic strap**, it offers a **non-slip sole** and quick fitting for immediate protection. This accessory is certified under **EU Regulation 2016/425** and is ideal for temporary or visitor protection requirements without the need for full safety boots.

Industries Served

- Construction Sites
- Manufacturing & Assembly Facilities
- Industrial Plants & Workshops
- Warehouse & Logistics Operations
- Facility Maintenance and Inspections
- Visitor Safety Programs

Natural latex gloves without support for electrical work. CLASS 00 – 500V. Supersafe GP 688DI00BE

The **Dielectric Protective Gloves** are natural latex gloves designed specifically for electrical risk protection. Constructed from high-quality natural latex with an ergonomic shape and lightly powdered interior for easy donning and removal, they deliver reliable insulation for low-voltage electrical work. These gloves offer excellent dielectric properties with protection up to **500 V (Class 00)** and are also resistant to acids, oil, ozone, and very low temperatures.

They are certified under **EN 60903** and **EN ISO 21420**, with rigorous visual, dimensional, mechanical, and dielectric tests ensuring dependable performance in electrical environments.

Industries Served

- Electrical & Power Utilities
- Maintenance & Facilities Services
- Telecommunications
- Energy & Renewable Power
- Industrial Installations & Repairs
- Construction Electrical Works
- Utility Distribution & Grid Maintenance
- Technical Service Providers

Natural latex gloves without support for electrical work. CLASS 0 – 1000V. Supersafe GP 688DI00BE

The **Dielectric Protective Gloves** are natural latex gloves engineered to provide reliable insulation and protection during electrical work. Made from high-quality natural latex with an ergonomic shape and lightly powdered interior, they are easy to don and remove while offering excellent dielectric properties. These gloves deliver **Class 0 protection up to 1000 V AC**, resist acids, oil, ozone, and very low temperatures, and undergo rigorous testing including visual, dimensional, and dielectric checks to ensure dependable performance in electrical risk environments.

They meet **EN ISO 21420** and **EN 60903** standards for electrical protective gloves.

Industries Served

- Electrical & Power Utilities
- Maintenance & Facilities Services
- Telecommunications
- Energy & Renewable Power
- Industrial Installations & Repairs
- Construction Electrical Works
- Utility Distribution & Grid Maintenance
- Technical Service Providers

Natural latex gloves without support for electrical work. CLASS 2 – 17000V. Supersafe GP 688DI2BE

The **Dielectric Protective Gloves** are high-quality natural latex gloves engineered for electrical risk protection in professional environments. Designed with an ergonomic shape and a lightly powdered interior for easy donning and removal, these gloves provide excellent dielectric insulation up to **17000V AC (Class 2)**, making them suitable for demanding electrical work. Their natural latex composition offers high dielectric properties while maintaining good tactile sensitivity. The gloves are also resistant to acids, oil, ozone, and very low temperatures, and they undergo rigorous testing including visual, dimensional, mechanical, and dielectric checks to ensure dependable performance.

They are certified to **EN 60903 (Class 2)** and **EN ISO 21420** standards.

Industries Served

- Electrical & Power Utilities
- Maintenance & Facilities Services
- Telecommunications
- Energy & Renewable Power
- Industrial Installations & Repairs
- Construction Electrical Works
- Utility Distribution & Grid Maintenance
- Technical Service Providers

Natural latex gloves without support for electrical work. CLASS 4 – 36000V. Supersafe GP 688DI4BE

The **Dielectric Protective Gloves** are high-performance natural latex gloves engineered to provide **Class 4 electrical insulation**, offering protection up to **36 000V AC** for demanding high-voltage environments. Constructed from premium natural latex with an ergonomic shape and lightly powdered interior for easy donning and removal, these gloves deliver excellent dielectric properties while maintaining a comfortable tactile feel. They are resistant to acids, oil, ozone, and very low temperatures, and undergo rigorous visual, dimensional, mechanical, and dielectric testing to ensure reliable performance.

Certified to **EN 60903 (Class 4)** and **EN ISO 21420**, these gloves are ideal for professional electrical work where maximum insulation and safety are essential.

Industries Served

- Electrical & Power Utilities
- High-Voltage Maintenance & Servicing
- Telecommunications
- Energy & Renewable Power
- Industrial Installations & Repairs
- Construction Electrical Projects
- Utility Distribution & Grid Infrastructure
- Technical Service Providers

ESD (S3S SR FO WPA E A) Metal Free "FLEXUM Z5" 1688ZFZ5GYF

The **Dielectric Protective Gloves** are natural latex electrical protection gloves designed to deliver Class 3 insulation performance for high-voltage electrical work. Constructed with an ergonomic shape and lightly powdered interior for easy donning and removal, they offer high dielectric properties with protection up to approximately **26 500V AC (Class 3)** while maintaining good tactile sensitivity. The natural latex material also provides resistance to acids, oil, ozone, and very low temperatures. These gloves undergo rigorous visual, dimensional, dielectric, and mechanical testing to ensure dependable performance.

They comply with
EN 60903 and
EN ISO 21420 standards
for electrical protective
gloves.

Industries Served

- Electrical & Power Utilities
- High-Voltage Maintenance & Servicing
- Telecommunications
- Energy & Renewable Power
- Industrial Installations & Repairs
- Construction Electrical Projects
- Utility Distribution & Grid Infrastructure
- Technical Service Providers

watchgas
detection

WatchGas SST1 – Single Gas Detector

The **WatchGas SST1** is a compact, portable **single-gas detector** designed to provide continuous, maintenance free protection for up to **2 – 3 years** without the need for calibration, battery replacement, or charging, ideal for use in demanding industrial environments such as oil & gas, construction, utilities, and confined spaces.

Intuitive and easy to use, the SST1 features a large LCD display, reliable sensors, and a rugged IP67-68 body that withstands harsh conditions. With NFC compatibility and a robust alarm system, it provides instant alerting and simple inspection management.

Industries Served

- Oil & Gas
- Petrochemical & Chemical Plants
- Construction & Infrastructure Projects
- Utilities & Power Generation
- Manufacturing & Industrial Facilities
- Confined Space Operations
- Mining & Heavy Industry
- Logistics, Warehousing & Maintenance Operations
- Municipal & Public Services

- **Maintenance-free operation**
up to 2–3 years without calibration, charging, or battery changes
- **Large LCD display** for clear gas concentration and status indicators
- **95 dB audible alarm** @ 30 cm for immediate alerting in noisy environments

- **NFC communication** for configuration and fleet management
- **Rugged, compact design** with IP67–68 protection for dust and water resistance
- **Event logging** stores the last 100 events for safety traceability
- **Simple one-button operation** reduces need for extensive training

- **ATEX & IECEx**
- **UKEX II 1 G Ex ia IIC T4 Ga**
- **CSA C22.2 NO. 60079-0 & NO. 60079**
- **UL61010/CAN/CSA safety standard**
- **CE & EMC Directives compliance**

WatchGas SST4 Micro & Mini

The **WatchGas SST4** (available in **Micro** and **Mini** versions) is a next-generation **four-gas portable detector** designed for demanding industrial environments including oil & gas, steel plants, confined spaces, and emergency response. Featuring **compact rugged construction**, intuitive NFC setup, and reliable multi-gas sensing, the SST4 keeps workers safer by detecting multiple hazardous gases simultaneously.

Available with flexible sensor configurations, the SST4 can be tailored to detect oxygen (O_2), carbon monoxide (CO), hydrogen sulfide (H_2S), sulfur dioxide (SO_2), and combustible gases (LEL) with options for low-power catalytic, catalytic bead, or NDIR combustible sensors.

Industries Served

- Oil & Gas & Petrochemical
- Heavy Industry & Manufacturing
- Utilities & Energy
- Construction & Infrastructure
- Mining & Metallurgy
- Wastewater & Environmental Services
- Fire & Emergency Response

- **Simultaneous four-gas detection** (O₂, CO, H₂S, SO₂, LEL options)
- **Built-in NFC communication** for quick setup and fleet management
- **Wireless (induction) charging** no exposed ports to wear or clog
- **Rugged IP65/68 housing** reliable under harsh conditions

- **Fast response time (T90)** and configurable alarm limits (TWA/STEL/high/low)
- **Large, easy-read display** and audible/vibration/visual alarms
- **Event & data logging** 100 events logged; up to 6 months of data storage
- **Compatible with the WatchGas SST ecosystem** (SST Dock, RTR Software) for compliance and fleet tracking

- **ATEX / IECEx / UKEX Zone 0 & Division 1**
- **North America:** Class I Div.1 Gr. A,B,C,D
- **European Compliance:** EN 50270, EN 301 489 (EMC), RoHS

Administrator® Safety S5

The **Dikamar Administrator Safety S5** Boot is designed to deliver **robust all-round foot protection** for industrial and construction environments. Featuring a **steel toe cap and a steel midsole**, this PVC safety boot meets **S5 classification** for impact, penetration, and slip resistance, ideal for heavy-duty work where hazardous materials, slippery surfaces, and falling objects are a concern.

Made from **durable PVC materials**, these boots are resistant to oils, fats, acids, and chemicals, while offering comfort and longevity for long work shifts.

Industries Served

- Construction & Infrastructure
- Manufacturing & Fabrication
- Utilities & Industrial Services
- Oil, Gas & Petrochemical
- Maintenance & Workshops

- **S5 Protection Level** impact and penetration protection (steel toe & midsole)
- **PVC upper & sole** durable, waterproof, and easy to maintain

- **Excellent slip resistance** on wet or oily surfaces
- **Resistant to oils, fats, acids & solvents**
- **Textile lining** for enhanced comfort

- **Reinforced side and heel protection**
- **Comfortable fit ideal** for all-day wear

Administrator® Safety Plus S5

The **Dikamar Administrator Safety Plus S5** Boot is engineered to deliver robust foot protection in the harshest industrial and construction environments. With a **steel toe cap and steel midsole**, this PVC safety boot offers full S5 protection, shielding the foot from impact, penetration, and hazardous job site conditions.

Designed with a **nitrile/polymetric PVC sole**, this boot provides excellent **slip resistance** and **antistatic performance** while resisting oils, fats, acids, and organic solvents. Its deflector features add extra protection to the **front, ankle, and heel**, ensuring safety without compromising comfort.

Industries Served

- Construction & Infrastructure
- Manufacturing & Fabrication
- Automotive Workshops
- Utilities & Industrial Services
- Oil, Gas & Petrochemical

- **S5 Protection Level** steel toe cap & steel midsole for full safety compliance
- **PVC upper & sole** durable and easy to clean

- **Slip-resistant & antistatic outsole** enhanced grip on slippery surfaces
- **Resistant to oils, fats, acids & solvents** suitable for tough workplaces

- **Deflector protection** front, ankle & heel reinforcement
- **Textile lining** for all-day comfort

 **NIGHTSTICK®**
Life Depends on Light™

Intrinsically Safe Dual-Light Headlamp XPP-5454G

The **XPP-5454G** is a rugged, **intrinsically safe headlamp** designed for use in hazardous industrial environments where flammable gases, vapors, or dust are present. Its **Dual-Light™ technology** provides both a **focused spotlight for distance** and a **wide floodlight for close-range tasks**, giving professionals dependable illumination whether inspecting, maintaining, or working in confined or low-light spaces.

Certified for use in the most demanding locations, this headlamp delivers reliable performance with a tough polymer housing, water and impact resistance, and easy-to-operate dual switches.

Industries Served

- Oil & Gas & Petrochemical
- Industrial Manufacturing & Processing
- Utilities & Power Infrastructure
- Mining & Heavy Industry
- Confined Space & Rescue Services
- Hazardous Location Maintenance Teams

- **Intrinsically Safe Certified**
cETLus, ATEX Zone 0, IECEx, UKCA & INMETRO hazardous location approvals
- **Dual-Light™ Technology**
spotlight, floodlight, and simultaneous combined lighting modes
- **Multiple Brightness Levels**
high and low settings for both spotlight and floodlight

- **Adjustable Ratchet Tilt Head**
directs beam where you need it
- **Included Head & Hard Hat Straps** elastic non-slip and heavy-duty rubber for versatile mounting
- **IP67 Dust & Waterproof Rated**
built for tough field conditions

- **Impact & Chemical Resistant Housing** engineered polymer for durability
- **Powered by 3 × AAA Batteries (Included)** long runtime with widely available battery power

Intrinsically Safe Dual-Light Headlamp XPP-5450G

The **XPP-5450G** is a professional-grade **intrinsically safe headlamp** engineered for use in hazardous industrial environments where explosive gases, vapors, or dusts may be present. Featuring **Dual-Light™ technology**, this headlamp delivers both a powerful **spotlight for long-range visibility** and a **wide floodlight for near-task illumination**, making it ideal for inspection, maintenance, and work in confined or low-light areas.

Designed for comfort and durability, the XPP-5450G includes a rugged polymer housing, adjustable head strap, and certification for use in the most demanding safety applications.

Industries Served

- Oil & Gas & Petrochemical
- Industrial Manufacturing & Processing
- Utilities & Energy Infrastructure
- Mining & Heavy Industry
- Confined Space & Safety Services
- Maintenance & Field Operations

- **Intrinsically Safe Certified**
explosion-proof approvals for hazardous areas
- **Dual-Light™ Technology**
spotlight and floodlight modes for task versatility

- **Multiple Brightness Levels**
optimized output and battery life
- **Rugged IP67 Waterproof & Dustproof Housing** built for harsh industrial conditions
- **Impact & Chemical Resistant Construction** durable for field use

- **Hard Hat Compatible** with included mounting accessories
- **Comfortable Adjustable Head Strap** for hands-free operation

Intrinsically Safe Dual-Light™ Flashlight XPP-5414GX

The **XPP-5414GX** is a premium, **intrinsically safe hand-held flashlight** engineered for use in hazardous industrial environments where flammable gases, vapors, or dusts are present. Featuring **Dual-Light™ technology**, this light delivers both a powerful spotlight for long-range visibility and a floodlight for close-range tasks, making it exceptionally versatile on the job. Its rugged housing, dependable performance, and hazardous area certification make it suitable for professionals in oil & gas, petrochemical, utilities, and confined space work.

Industries Served

- Oil & Gas & Petrochemical
- Industrial Manufacturing & Processing
- Utilities & Power Generation
- Mining & Heavy Industry
- Confined Space & Rescue Operations
- Maintenance & Safety Teams

- **Dual-Light™ Technology**
spotlight and floodlight modes for task versatility
- **Intrinsically Safe Certified**
explosion-proof approvals for hazardous location

- **Multiple Output Levels** for optimized brightness and runtime
- **Rugged IP67 Waterproof & Dustproof Housing** built for harsh environments
- **Impact & Chemical Resistant Construction**

- **Comfort-Grip Design** with easy-to-operate controls
- **Powered by Replaceable Batteries** for convenience in the field

Intrinsically Safe Dual-Light™ Flashlight XPP-5422GA

The **XPP-5422GA** is a high-performance **intrinsically safe task light** engineered for hazardous industrial environments where explosive gases, vapors, or dusts may be present. With **Dual-Light™ Technology**, this light delivers both a powerful spotlight for distance tasking and a bright floodlight for area illumination, all in a compact, rugged design.

Certified for use in classified hazardous locations, the XPP-5422GA offers professionals dependable, versatile lighting whether handheld, clipped, or strapped, making it ideal for oil & gas, utilities, confined space work, and maintenance in explosive atmospheres.

Industries Served

- Oil & Gas & Petrochemical
- Industrial Processing & Manufacturing
- Utilities & Power Infrastructure
- Mining & Heavy Industry
- Rescue & Safety Services
- Confined Space Operations

- **Intrinsically Safe Certified**
explosion-proof approvals for hazardous areas
- **Dual-Light™ Technology**
spotlight and floodlight modes for task flexibility
- **Multiple Brightness Levels** for optimized runtime and output

- **Rugged IP67 Waterproof & Dustproof Housing** withstands harsh conditions
- **Impact & Chemical Resistant Polymer Construction**
- **Ergonomic grip with easy-to-operate controls**

- **Rechargeable or Replaceable Battery Options** (model dependent)
- **Suitable** for handheld or hands-free use with accessories

Intrinsically Safe Dual-Light™ Area XPR-5522GMX

The **XPR-5522GMX** is a rugged, **intrinsically safe area and utility work light** designed for demanding industrial and hazardous environments. Featuring **Dual-Light™** technology, it provides both **powerful spot illumination** and a wide floodlight field, allowing users to illuminate large work areas or focus on specific tasks.

Built for durability and safety, this lighting solution carries hazardous-location certifications and delivers **consistent, dependable illumination** for maintenance, inspection, confined space entry, and general industrial operations where both performance and safety are critical.

Industries Served

- Oil & Gas & Petrochemical
- Industrial Manufacturing & Processing
- Utilities & Power Infrastructure
- Mining & Heavy Industry
- Confined Space & Rescue Operations
- Maintenance, Inspection & Shutdown Teams

- **Dual-Light™ Technology**
spotlight for distance plus
floodlight for area illumination
- **Intrinsically Safe Certified**
safe for use in explosive
atmospheres and hazardous
zones

- **Multiple Output Levels** for
optimized brightness and
battery runtime
- **IP67 Waterproof & Dustproof
Housing** built for harsh field
conditions
- **Impact & Chemical Resistant
Construction** for industrial use

- **Convenient Hands-Free
Mounting Options** for utility
and area work
- **Long-Run Battery Capability**
for extended field operations
- **Hard-wearing and
ergonomic** for daily jobsite
use

Intrinsically Safe Dual-Light™ Flashlight XPP-5422BA

The **XPP-5422BA** is a rugged, **intrinsically safe hands-free task light** engineered for use in hazardous industrial environments such as oil & gas, petrochemical, confined spaces, and maintenance operations. Its **Dual-Light™ Technology** delivers both a powerful spotlight for long-range visibility and a floodlight for close-range tasking. Optimized for **hands-free use**, this model features integrated mounting options for helmet/bracket clips, making it perfect for technicians working in classified areas where reliable illumination and safety certification are essential.

Industries Served

- Oil & Gas & Petrochemical
- Industrial Manufacturing & Processing
- Utilities & Power Infrastructure
- Mining & Heavy Industry
- Confined Space & Safety Services
- Maintenance & Field Support Teams

- **Intrinsically Safe Certified**
explosion-proof approvals for hazardous locations
- **Dual-Light™ Technology**
spotlight and floodlight modes for versatile task lighting

- **Hands-Free Operation**
clip/strap compatibility for helmets and gear
- **Multiple Brightness Levels** for optimized runtime and visibility
- **Rugged IP67 Waterproof & Dustproof Housing** built for harsh environments

- **Impact & Chemical Resistant Construction** protects electronics and casing
- **Lightweight and Portable** for everyday industrial use

[Zone 0] USB IS Dual-Light Headlamp XPR-5554G

The **XPR-5554G** is a powerful, intrinsically safe area/utility light built for demanding industrial and hazardous environments. Featuring **Dual-Light™ Technology**, this unit delivers both a **focused spotlight for distant tasks** and a **wide floodlight for area illumination**, making it ideal for maintenance crews, inspectors, emergency responders, and utility professionals working in classified zones.

Engineered for rugged use, the XPR-5554G combines certified safety ratings with durable construction, dependable performance, and versatile mounting / operation options, delivering reliable lighting where it matters most.

Industries Served

- Oil & Gas & Petrochemical
- Industrial Processing & Manufacturing
- Utilities & Power Infrastructure
- Mining & Heavy Industry
- Confined Space & Rescue Operations
- Maintenance & Field Support Teams

- **Dual-Light™ Technology**
spotlight + floodlight modes
for versatile jobsite lighting
- **Intrinsically Safe Certification**
for use in explosive
atmospheres
- **High-Output LED Performance**
with multiple brightness levels

- **Rugged IP67 Waterproof & Dustproof Housing** can
withstand harsh field
conditions
- **Impact & Chemical Resistant
Polymer Construction**
- **Multiple Mounting Options**
hands-free functionality for
versatile use

- **Long Battery Runtime**
supports extended operations
- **Lightweight & ergonomic
design** for industrial
environments

[Zone 0] VIRIBUS® 80 IS Rechargeable Dual-Light Lantern XPR-5580R

The **XPR-5580R** is a high-output **intrinsically safe area lighting solution** designed for use in hazardous industrial environments where flammable gases, vapors, or dusts are present. Featuring **Dual-Light™ technology**, this robust work light provides both **wide floodlight coverage** and a **focused spotlight**, ideal for large work areas, maintenance tasks, confined spaces, and inspection applications where reliable illumination is essential.

Certified for use in classified zones, the XPR-5580R combines durability, advanced lighting performance, and safety in one rugged package for professionals in mining, oil & gas, utilities, and heavy industry.

Industries Served

- Oil & Gas & Petrochemical
- Industrial Processing & Manufacturing
- Utilities & Energy Infrastructure
- Mining & Heavy Industry
- Confined Space & Rescue Operations
- Maintenance & Field Services

- **Dual-Light™ Technology**
powerful floodlight and focused spotlight for versatile task illumination
- **Intrinsically Safe Certified approved** for hazardous locations (ATEX, IECEx, cETLus, UKCA)
- **High-Output LED Performance**
bright, even area coverage

- **Rugged IP67 Waterproof & Dustproof Housing** built to withstand tough environments
- **Impact & Chemical Resistant Construction**
- **Mounting Options** hands free setup with integrated clips or fixtures

- **Extended Runtime** ideal for long field operations
- **Portable & Durable**
ergonomic and easy to deploy

[Zone 0] VIRIBUS® 80 IS Rechargeable Dual-Light Lantern XPR-5580G

The **XPR-5554G** is a powerful, **intrinsically safe area/utility light** built for demanding industrial and hazardous environments. Featuring **Dual-Light™ Technology**, this unit delivers both **a focused spotlight for distant tasks** and **a wide floodlight for area illumination**, making it ideal for maintenance crews, inspectors, emergency responders, and utility professionals working in classified zones.

Engineered for rugged use, the XPR-5554G combines certified safety ratings with durable construction, dependable performance, and versatile mounting / operation options, delivering reliable lighting where it matters most.
